

Genesys Predictive Engagement Administrator's Guide

Get started with Predictive Engagement for PureConnect

Contents

- 1 Complete the following procedures
- 2 For more information

To use Genesys Predictive Engagement, PureConnect customers complete these initial tasks.

Complete the following procedures

1. Verify prerequisites for PureConnect.
2. Configure Predictive Engagement in PureConnect.
3. Review the supported browsers.
4. Prepare the required Genesys Cloud domains.
5. Learn about Genesys Predictive Engagement's tracking capabilities and how to prepare widgets for Genesys Predictive Engagement. Then update your webpages with the Genesys Predictive Engagement tracking snippet.
6. Configure Web tracking.

Tip

Initially, configure only the allowed domains. Then use Live Now to verify that Genesys Predictive Engagement is tracking events. After basic tracking works, configure the rest of the web tracking settings.

7. Create segments
8. Create outcomes.
9. Build actions.
10. Build action maps.
11. Use LiveNow to see customer activity on your website
