- [7 Region names and IDs](#)

---

Learn how to use the `init` method to initialize the Journey JavaScript SDK.

### Important

This article only applies to customers using web chat. If you are a Genesys Cloud CX customer, we encourage you to use the new web messaging feature to replace web chat.

## Description

The `init` method initializes the Journey JavaScript SDK.

### Important

For GDPR compliance, obtain a customer's consent before you call the `init` method. For more information about how to use Genesys Predictive Engagement in a GDPR-compliant manner, see [GDPR](#).

## Signature

```
ac('init', organisationId, options)
```

## Arguments

- `organizationId`
- `options`

`organizationId`

- **Description:** Your organization's unique ID. Find your organization ID
- **Type:** String
- **Status:** Required

## options

### Tip

For detailed explanations of how you can use these options to configure tracking, see [Advanced tracking with cookies](#).

- **Description:** Configures the Journey JavaScript SDK with its region and other known default options.
- **Type:** Object
- **Status:** Required
- **Properties:** See the following table.

Name	Description
region	Your organization's region. Find your region ID
cookieDomain	Sets a custom cookie domain.
cookieExpires	Sets a time in seconds for a visitor's cookie to expire.
cookiePrefix	Sets a custom cookie prefix.
autoLink	An array of domains whose outbound links will be modified to contain tracking information for advanced tracking.
allowedLinkers	An array of domains whose inbound referral will set tracking information. For an example, see <a href="#">Allowed Linkers</a> .
canonicalLink	Uses canonical links.
globalTraitsMapper	Maps custom attributes to traits. For more information, see <a href="#">Traits Mapper</a> .

## Find your org ID and region ID

---

Region name	ID
EMEA (Frankfurt)	euc1
Asia Pacific (Tokyo)	apne1
Asia Pacific (Seoul)	apne2
Asia Pacific (Sydney)	apse2
