Designer is a web-based tool for developing self-service (IVR) and assisted service (routing) applications that run on the Genesys Multicloud CX platform. It is an omnichannel solution, enabling you to craft applications that handle voice, chat, and email interactions.

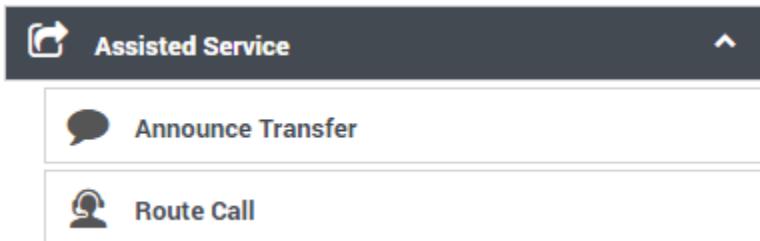

This video shows a quick overview of Designer and demonstrates a few of its latest features:

[Link to video](#)

Designer provides easy-to-use, highly functional blocks that enable common tasks in a simple and straightforward manner. For example, there are blocks for building menus, playing messages, setting up decision points, routing interactions to agents, and offering surveys.

To build an application, you simply drag blocks from the **Palette** and drop them into the **Application Flow**, which is divided into phases and represents the application structure.

For example, you might use the following blocks in the **Assisted Service** phase, in which an agent helps a customer. The first block controls the announcement to the caller that they are being transferred, and the second block controls the routing function to an agent:

## Before you start

### Important!

Some of the features and functionality described in these topics might not be applicable to all deployments. Contact your Genesys representative if you have any questions about what is available in your version of Designer.

### Supported browsers

Unless otherwise noted, Designer supports the latest versions of the following browsers:

- Mozilla Firefox
- Google Chrome (see Important, below)
- Microsoft Edge
- Apple Safari

**Not supported:** Internet Explorer (all versions)

---

## Important

For Google Chrome, Designer supports the *n-1* version of the browser, i.e. the version prior to the latest release.

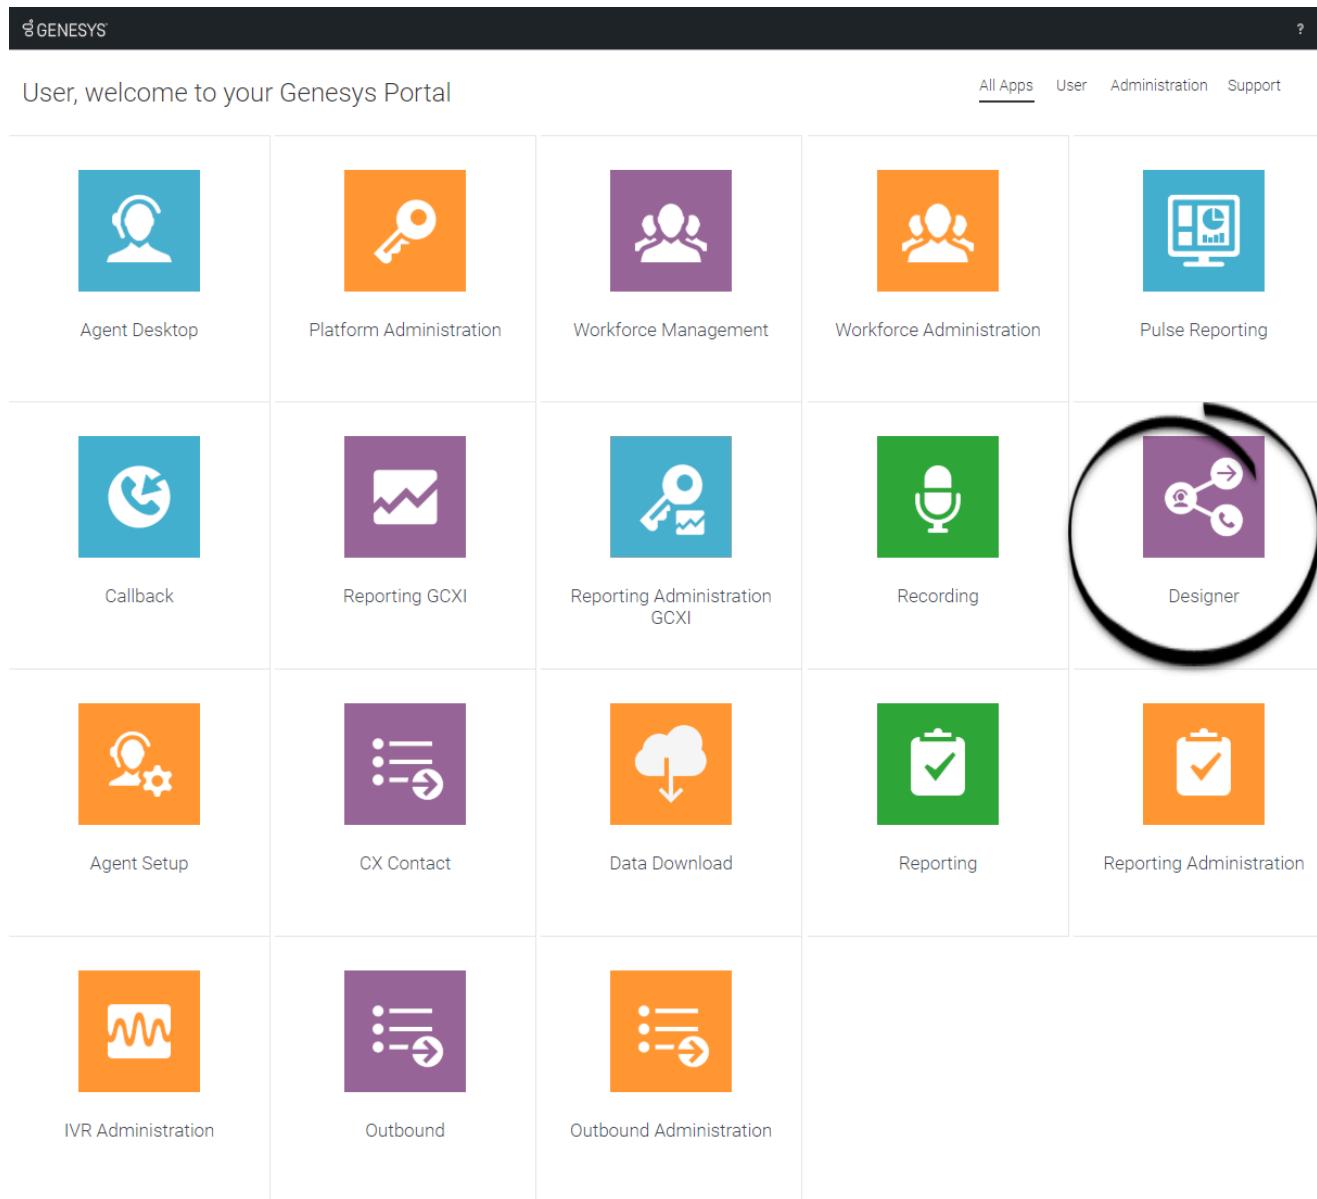

## Minimum display resolution

The **minimum** display resolution supported by Designer is **1920 x 1080**.

## Third-party cookies

Certain features in Designer require the use of third-party cookies. Browsers must allow third-party cookies to be stored for Designer to work properly.

## Access the application

The screenshot shows the Genesys Portal home page with a grid of application icons. The icons are arranged in four rows. The first row contains: Agent Desktop (blue), Platform Administration (orange), Workforce Management (purple), Workforce Administration (orange), and Pulse Reporting (blue). The second row contains: Callback (blue), Reporting GCXI (purple), Reporting Administration GCXI (blue), Recording (green), and Designer (purple, circled). The third row contains: Agent Setup (orange), CX Contact (purple), Data Download (orange), Reporting (green), and Reporting Administration (orange). The fourth row contains: IVR Administration (orange), Outbound (purple), and Outbound Administration (orange). The Designer icon is highlighted with a black circle.

Agent Desktop	Platform Administration	Workforce Management	Workforce Administration	Pulse Reporting
Callback	Reporting GCXI	Reporting Administration GCXI	Recording	Designer
Agent Setup	CX Contact	Data Download	Reporting	Reporting Administration
IVR Administration	Outbound	Outbound Administration		

Once your Genesys Multicloud CX environment is up and running and you've checked that you meet the necessary requirements, log in to your Genesys Portal to access Designer. Click the Designer icon and enter your username and password.

## Walk through the application

Watch this video to see an overview of the Designer user interface:

---

## Link to video

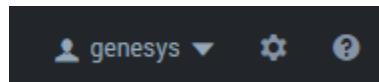

The various elements within the interface are described below.

### Navigation bar

Provides one-click access to Applications, Shared Modules, Media Resources, Digital Resources, Speech Grammars, and Business Controls objects.

### Workspace toolbar

Provides buttons for common actions. Click your user name to log off. Click the settings icon to view or modify the global **Caching** settings for certain resources and to toggle certain **Features**. Click the Help icon to access the Designer Help.

### Application toolbar

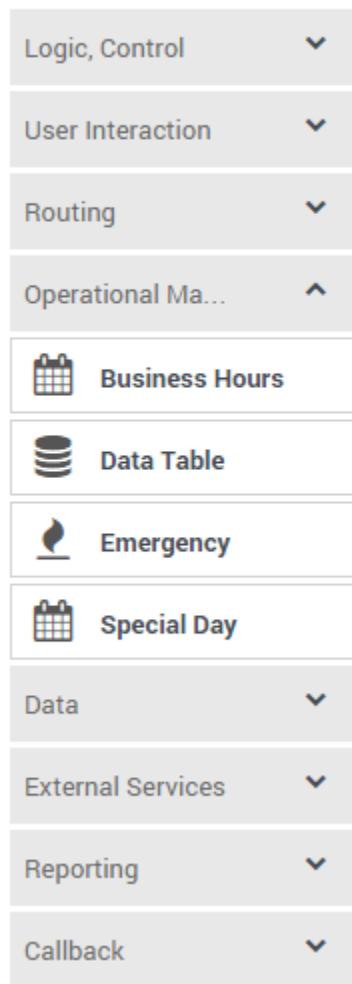

Provides buttons for common actions. Click Settings to set global settings for your application. Click Save Flow to save and validate your application, or click **Publish** to save and validate your application and prepare it for use by routing engines. Click **Build** to create and manage the builds associated with the application.

---

## Palette

### Palette

Provides all available blocks that you can use in your application, sorted by functional grouping.

## Actions toolbar

Many of the resource pages in Designer have an **Actions** toolbar. The action items on the toolbar will vary based on the resource page you are viewing. For more information, see Actions toolbar.

## Application flow

Application Flow Actions ▾

Initialize

Assign - Initialization

Self Service

Emergency check

Special Days - Check holidays

Check Business Hours

Milestone - Application Started

Play Message

Menu - Main

Main - Sales

Provides the main area to build your application by adding blocks. For more information, see [Using the blocks](#).

## Help pane

### Properties - Menu - Main

 This block can be used to speak a list of choices to callers and get their selection. Based on this selection, commonly used actions can be defined in Menu option blocks. To start, select the DTMF keys you would like to use.

Displays help information for the selected block.

## Block properties

Menu Prompts    DTMF Options    Retry Prompt    Results

Milestone

Specify prompts to play to offer menu selection

+ Add Prompt

Type	Variable?	Value	Play as	Actions
TTS	<input type="checkbox"/>	Press 1 for sales.	<input type="button" value=""/>	
TTS	<input type="checkbox"/>	2 for service.	<input type="button" value=""/>	
TTS	<input type="checkbox"/>	3 to check if there are any supr	<input type="button" value=""/>	

Timeout - wait for  s before assuming that no input was received.

Displays all properties exposed by a block and provides assistance to set them:

## Quick filters

Quick Filters General Routing Voice only applications Bot

This toolbar enables you to filter a list of resource items by selecting one or more filters that are associated with tags. The list then refreshes to show only those items that match the selected filters. For more information, see Using the Quick Filters.

## Next steps

Use this page as a starting point to learn more about key Designer features and concepts:
