Voice Mail Block

10/7/2024

Contents

- [1 Using this block](#)
 - [1.1 Voice mail routing](#)

- Administrator

Use this block to route calls to voicemail.

Related documentation:

-

You can use the **Voice Mail** block in the **Assisted Service** phase to route calls to voicemail.

You can sequentially add multiple **Voice Mail** blocks with different settings, so that if routing fails, the next block is used. When a **Voice Mail** block successfully routes the call to voicemail, the application moves to the **Finalize** phase, ignoring any subsequent blocks in the **Assisted Service** phase.

Using this block

Voice mail routing

Select the voicemail number to which you want to route the call.

Properties - Voice Mail

This block is used to route calls to a voice mail box number.

Voice mail routing

Voice mail box number (string value)
