## Gplus Adapter for ServiceNow Agent's Guide

How to handle screen pops in ServiceNow

9/3/2025

#### Contents

- 1 Outbound calls to a known contact
- 2 Relevant links

Screen pops display a relevant record from ServiceNow when agents receive or make calls.

#### Outbound calls to a known contact

As one would expect, you can equally make outgoing calls. However, you can exclusively make outbound calls to records already existing in ServiceNow. If you wish to call a brand-new contact, first you need to register it within the CRM.

You can make outbound calls just clicking the **phone icon** next to the selected contact telephone number. For further information on the click-to-call feature, see Know more about supported features.

When the outbound call connects, you receive a Service Now **screen pop** with an outgoing Activity History of type Call.
