GENESYS™

GDL Deployment Guide

Configure Producer and Consumer Config

2/5/2026

Contents

Configuring client side ports to access Kafka layers.

Access GDL

Client VM must be able to Telnet to all the Kafka nodes within the same network. Further reference of connecting Kafka nodes can be referred at https://kafka.apache.org/documentation/

Refer Producer Config and Consumer Config section for configuring the Kafka layers.

Mention the Kafka ports in Config property as given below.

`bootstrap.servers-host1:port1,host2:port2,...`

where `host1:port1` will be `localhost:9092` and so on.
