Important

Agent Setup only supports Transaction List objects.

You can configure the following business attributes at the transaction level:

- Dispositions
- Case Data
- Toast Data
- Caller IDs
- Favorites

Select **Transactions** in the navigation menu to access the **Transactions** page. The **Transactions** main view lists the transactions only by name. Click the link for the transaction to view the details.

Use the following procedures to create and configure transactions.

Adding a new transaction

<input type="checkbox"/>	Name
<input type="checkbox"/>	UserPreference/default
<input type="checkbox"/>	Internal/Support
<input type="checkbox"/>	Internal/ORS

Click the **New Transaction** button, type a unique name in the **Transaction name** field, select a folder to store the transaction configuration, and then click **Add**. If you do not select a folder, the transaction is stored in the /default directory.

The name of the transaction is prefixed with the name of the folder. For example, UserPreference/. At this point, configuration is not complete. You need to add business attributes to the transaction.

Tip

You can manage folders from this page. When you select the **Folder** option, a drop-down list box is displayed where you can select a folder or click the add folder icon

to create a new folder.

Adding business attributes to a transaction

- Toast Data
- Caller ID
- Favorites

Manage Dispositions

Dispositions are the descriptions of the final outcome of the call. These codes are used to...

Folder: /DEVOPS/ Select Business Attribute ...

+ Add Add Folder Delete

No Items Found

To edit a transaction, click the link in the **Name** column. If the transaction has no configured business attributes, as is the case when you add a new transaction, you are prompted to complete the configuration. Follow the prompts to add **Dispositions**, **Case Data**, **Toast Data**, **Caller ID**, and **Favorites** business attributes. After you add the business attributes, you can define them.

Managing dispositions

The screenshot shows the 'Manage Dispositions' interface. At the top, it says 'Dispositions are the descriptions of the final outcome of the call. These codes are used to flag calls for reporting purposes.' Below this, there is a text input field for 'Folder: /DEVOPS/' and a dropdown menu for 'Disposition_Sales'. There are three buttons: '+ Add', 'Add Folder', and 'Delete'. To the right is a 'Quick Filter' search box. Below these elements, there is a list of dispositions. The first item is 'Sales: Follow-up required' with an unchecked checkbox. Below it, there are two columns: 'Name' and 'Display name', each with an unchecked checkbox.

Dispositions are the descriptions of the final outcome of the call. These codes are used to flag calls for reporting purposes. To learn more about how to manage dispositions, see Dispositions.

Managing case data

The screenshot shows the 'Manage Case Data' interface. At the top, it says 'Case data is the call information that is displayed about a call in progress.' Below this, there is a text input field for 'Folder: /DEVOPS/' and a dropdown menu for 'Support'. To the right is a blue button labeled 'Sort Case Data'. There are three buttons: '+ Add', 'Add Folder', and 'Delete'. To the right is a 'Quick Filter' search box. Below these elements, there is a list of case data items. The first item has a checkbox for 'Name', a text input for 'Display name', a checkbox for 'Mandatory', and a dropdown menu for 'Read Only'.

On the Manage Case Data screen, you can specify the information to be displayed to the agent when an interaction is transferred to them. To learn more about how to manage case data, see Case and toast data.

Managing toast data

The screenshot shows the 'Manage Toast Data' interface. At the top, there is a title 'Manage Toast Data' and a subtitle 'Toast data is the call information that is displayed for a ringing call.' Below this, there are two input fields: 'Folder: /DEVOPS/' and a dropdown menu set to 'Support'. Underneath these are three buttons: '+ Add', 'Add Folder' (with a folder icon), and 'Delete' (with a trash icon). To the right is a 'Quick Filter' search box. The main content area contains a table with two columns: 'Name' and 'Display name'. The 'Name' column has a blue border around its header text.

On the Manage Toast Data screen, you can specify the information to be displayed to the agent when they receive a call, chat, or other interaction. To learn more about how to manage toast data, see [Case and toast data](#).

Managing caller IDs

The screenshot shows the 'Manage Caller IDs' interface. At the top, there is a title 'Manage Caller IDs' and a subtitle 'A Caller ID is a registered phone number that the caller can see. You can select a caller ID for the contact center or for a team.' Below this, there are two input fields: 'Folder: /DEVOPS/' and a dropdown menu set to 'Caller ID-Sales'. Underneath these are three buttons: '+ Add', 'Add Folder' (with a folder icon), and 'Delete' (with a trash icon). To the right is a 'Quick Filter' search box. The main content area contains a table with two columns: 'Name' and 'Display name'. The 'Name' column has a blue border around its header text. Below the header, there is one row with a checkbox and the text 'Sales: 1-555-555-5555'.

You can allow agents to select from a predefined list of caller IDs. The selected caller ID is then displayed to the person receiving the call when the agent consults, conferences, or transfers a call. To learn more about how to manage caller IDs, see [Add and manage Caller ID](#).

Managing favorites

Favorites

Favorites is a list of Agents, Agent Groups or external contacts that group members frequently dial. This list provides a click-to-call list of these numbers on Agent Desktop.

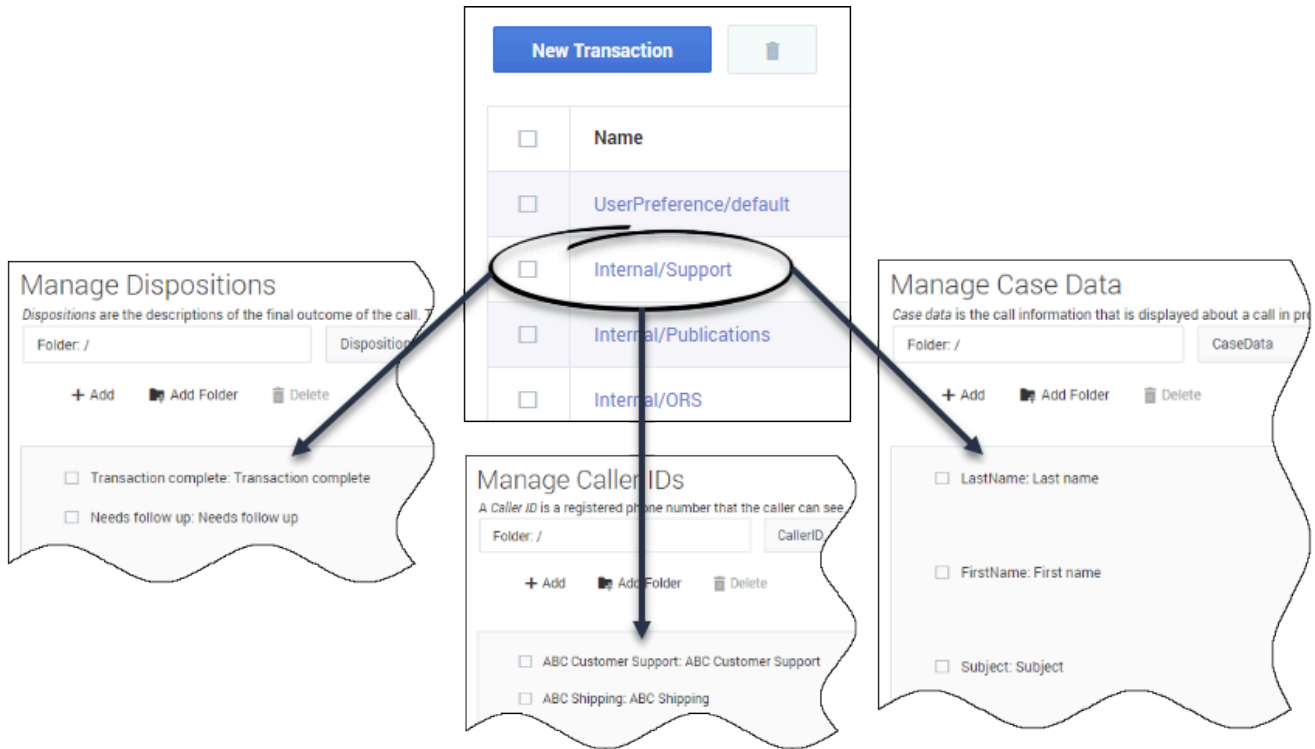

[Add Favorites](#)

Favorites List (0)

<input type="text" value="Filter Items"/>	 Delete
No Contacts Found	

On the **Favorites** screen, you can create a list of agents, agent groups, or external contacts that agent group members frequently dial. This list provides a click-to-call list of these numbers on Agent Workspace. To learn more about how to manage favorites, see [Global Favorites](#).

What should a configured transaction look like?

In this example, the transaction includes the following business attributes:

Dispositions:

- Transaction complete
- Needs follow-up

Case Data

- First name
- Last name
- Subject

Caller IDs

- ABC Customer Support
- ABC Shipping

Use Case

In Agent Workspace, you have the ability to override desktop options by setting the value of a KVP to

the name of a transaction list object. The desktop option is `interaction.override-option-key`. In the inbound or outbound routing application, you set the value of the identified key to the name of the transaction list object and the desktop options in the transaction list object are used instead of the Agent Workspace application or agent group objects.
