Important

The features described here may not apply to your organization's setup. If you need features that aren't available to you, contact your administrator or Genesys representative.

Voicemail management gives you control over Voicemail Profiles and Voicemail Settings. To use voicemail, see [Voicemail for agents and supervisors](#).

Accessing Voicemail Management

To Access Voicemail Management within Agent Setup:

1. From the **Contact Center Settings**, select the **Voicemail & Call Settings** menu.
2. Choose a category to manage:
 1. Profiles
 2. Mailbox Settings

Profiles

Voicemail profiles are a common set of configurations that can be assigned to a set of mailboxes. These configurations include determining how many voicemails can be stored in a mailbox, the maximum message duration, how long voicemails are stored before they're deleted, enabling email notifications, and voicemail forwarding.

You can create profiles that set retention limits of 1 to 100 days or use No Limits to set voicemails not to expire.

Within the **Profiles** section you'll find the profile rules. To edit an existing profile rule, check the checkbox next to the Profile name and click the **Edit** icon (edit icon).

For information on all possible configurations for these profile rules, see:

- DialPlan
- Partition
- CallingProfile
- VoicemailProfiles

DialPlan

The DialPlan governs the disposition of inbound and outbound calls in SIP Server.

The following table lists all possible configurations for **VoicemailProfiles**:

Name	Description
Profile Name	The name given to the Profile.
Voicemail Forwarding	Specifies whether or not to forward a message from a mailbox.

Name	Description
Email Body	The Email Body for the email. For example, "Mailbox has a new message from ."
Email From Address	The From Address used in the email notification.

Mailbox Settings

Mailbox Settings are configurations that customize the mailbox as per the user's needs. This includes mailbox greetings, locale, time zone, optout number, and few more basic configurations listed in the **General Info** table, further down this page.

If you have a Comma-Separated Values (.csv), or Excel spreadsheet (.xls) file of your bulk mailbox settings already saved to your local drive, you can import it by clicking the **Bulk Import** button and navigating to that file's location on your local drive.

Click on a **Mailbox Number** to open that mailbox and review or update its settings. When you open a Mailbox Number, you're presented with 2 categories in the left-hand menu:

- General Info
- Greetings

Personal Greetings Upload/Reupload Play

Extended Absence Greetings Upload/Reupload

Standard Greeting Upload/Reupload Play

Cancel Save

Important

Greetings must be in .wav format.

To upload a **Personal**, **Extended Absence**, or **Standard Greeting**, click the **Upload/Reupload** button and choose a file from your local machine. Click **Play** to listen to the greeting before confirming your selection by clicking **Save**.

Group mailbox administrator

To define a specific user as a group mailbox administrator for a group mailbox associated with an Agent Group, add the **Voicemail** section to the annex of the user, then add the option **group-mailbox-administrator** with the following values:

option	value
group-mailbox-administrator	all or comma-separated mailbox numbers

The screenshot shows the 'Edit User' interface for a user named 'vmTest VoicemailTest1'. The 'Annex' section is open, specifically the 'Voicemail' section. The 'group-mailbox-administrator' option is selected, and the value '1001,1002' is entered in the input field. The interface includes a sidebar with various user management options like General Info, Skills, and Agent Groups, and buttons for Save, Save and close, and Delete User.
