Create or edit a Schedule

CX Contact Schedules allow you to create and run one or more Campaign Groups automatically and periodically using a predefined schedule. You can access and customize near-real time reporting data about Schedules from the Schedules Dashboard.

[Link to video](#)

1. Click the **Schedules** menu. The Schedules list appears. For details, see the Schedules List Properties table below.
2. Select your preferred view.
 - **Table View** - Lists all the existing schedules.
 - **Calendar View** - Displays all of the existing schedules in the day on which they are scheduled to start.
3. Select **New** to create a new schedule or click the name of the schedule you want to edit. Use the **Global** toggle to switch between global (UTC) and local time zones for the schedule.
4. Select the **Schedule Options** tab and set the available options. The options in the **Schedule Options** tab enable you to define when the Campaign Groups associated with the schedule is run. For details, see the Schedule Options Properties table below.

Schedule Options Campaign Groups

Define recurrence of the Outbound Schedule

Daily
 Weekly
 Monthly
 Once

Execute every n-th day between Start Date and End Date

Start Condition

* Repeat every at : from until

No End Date

* On the following Days of the Week

Monday
 Tuesday
 Wednesday
 Thursday
 Friday
 Saturday
 Sunday

Stop Condition (whichever occurs first)

Stop at :

Stop after

5. Select the **Campaign Groups** tab and select the Campaign Groups to which this schedule is applied. When the schedule is run, the selected Campaign Groups are activated. For details, see the Campaign Groups Properties table below.

Schedule Options **Campaign Groups**

Campaign Groups in Schedule

▼ Expand All ▲ Collapse All	Add	Q Search
▼ 123412341234-46326cfc@All Agents		
> Sequential commands		+
Instant commands		+

6. Select the **Campaign Group Dialing** panel and configure the following options:
 - **Change Dialing parameters** - Change the Campaign Group's pacing parameters.
 - **Force Stop** - Force the Campaign Group to be unloaded.
 - **Start** - Load the Campaign Group.

- **Start Paused** - Pause the Campaign Group.
- **Stop** - Unload the Campaign Group.

* Command: Change Dialing Parameters

* Condition: At time

Set Time

* at 8 : 00 AM

Campaign Group Dialing

Dialing Mode: Predictive

Optimization Parameter: Agent Busy Factor

Optimization Goal: 80 %

Engage agents first ?

Cancel Ok

7. Click **Save Schedule**.

Schedules List Properties

Column	Description
Name	Schedule name.
Description	Provides information about the purpose of the

Column	Description
	schedule.
Last Run	The last time and date the schedule was activated.
Status	<ul style="list-style-type: none"> • Active - Campaign groups associated with the specific schedule are currently running. • Idle - The schedule is active but is not being used. • Disabled - Campaign groups associated with the specific schedule are not active.
Schedule	A plain text description of the Schedule activation rules.
Last Modified Date	The last date and time the schedule was edited.
Created Date	The date and time the schedule was created.
Actions	<ul style="list-style-type: none"> • Enable - Instructs the system to run the schedule at its configured date and time. • Disable - Stops all subsequent runs. Note: Disabling a schedule doesn't delete the schedule. You can open and edit the schedule at any time to reschedule runs or hit the Play icon to restart it. • Delete - Removes the schedule from the system.

Schedule Options Properties

Column	Description
Name	Schedule name.
Description	Provides information about the purpose of the schedule.
