The Agent folder is organized into a series of subfolders, to make it easier to find the objects you need, as described in the following table. Many folders contain **Custom** folders, which are not described in this document; custom folders are provided to store any custom objects.

Important

Objects in each folder or subfolder are designed to be used together to create reports. Avoid mixing attributes and metrics from multiple folders into your reports. One exception to this rule is objects in the Time folder; Time attributes can be used in any report, and most reports include at least one attribute from the Time folder.

Folder: Agent

Introduced: 9.0.007.03

Description: The root Agent folder. Objects in this folder enable the organization and measurement of Info Mart agent data based on high-level characteristics of agent interactions. Other objects in this folder are organized into subfolders.

Folder: Agent > Activity

Introduced: 9.0.007.03

Description: Objects in this folder enable the organization and measurement of Info Mart agent data based on the interaction-related activities that are conducted by active agents at their DNs. Counts and duration metrics are attributed to the reporting interval in which interactions were offered to the agent.

Folder: Agent > Detail > Ixn State

Introduced: 9.0.007.03

Description: Objects in this folder enable the organization and measurement of Info Mart agent data based on the state of one leg of an interaction that is being processed by an agent. Unlike [[PEC-REP/Library/GCXIPRG/Agent#AgentStateandReasonInteractionState]], all metrics in this folder reflect detailed data.

Metrics:

Folder: Agent > State and Reason > Interaction State

Introduced: 9.0.007.03

Description: Objects in this folder enable the organization, measurement, and filtering of Info Mart agent data based on the specific interval in which interactions occur at agent DNs. Metrics are attributed to each reporting interval in which agents handle the interactions and durations are clipped at interval boundaries. Objects in this folder reflect data that is aggregated over a reporting interval. Unlike **Agent > Detail > Ixn State**, all metrics in this folder reflect aggregated data.
