Important

Use this document for Genesys CX Insights Multicloud deployments. For information relevant to Genesys CX Insights on-premises deployments, see the corresponding page in the *Genesys CX Insights on-premises Projects Reference Guide*.

The Business Attribute folder contains numerous metrics that you can use to build reports based on business attribute-related objects.

Note the following:

- Unless other wise noted, metrics that show time, display a whole integer representing the number of seconds.
- For detailed information about the different metric types, see About Genesys CX Insights Projects.

Important

Objects in each folder or subfolder are designed to be used together to create reports. Avoid mixing attributes and metrics from multiple folders into your reports. One exception to this rule is objects in the Time folder; Time attributes can be used in any report, and most reports include at least one attribute from the Time folder.

The following Metrics are available in this folder and are described on this page.

Introduced: 100.0.027.0001		
Description: Total number of cold transfers of interactions assigned this business attribute, that were		

initiated by the agent during the reporting interval.		
Calculation: Calculated as the difference between the Transfer Initiated Agent and Transfer Initiated Warm metrics.		Used in:

Metric name: Avg Turnaround Time		Folder: Business Attribute > BA Predictive Routing
Description: The average amount of time that interactions waited for predictive routing scoring to be completed. This calculation considers all calls, within the reporting period, that used a given Predictor and Model. Calculated as the sum of all agent scores for agents who handled an interaction routed by GPR, divided by the total number of interactions.		
Calculation: Calculated based on the Business Attribute > BA Customer > Accepted and Business Attribute > BA Predictive Routing > Turnaround Time metrics.		Used in: <ul style="list-style-type: none"> • Predictive Routing - Model Efficiency • Predictive Routing Operational Report
