Important

Use this document for Genesys CX Insights Multicloud deployments. For information relevant to Genesys CX Insights on-premises deployments, see the corresponding page in the *Genesys CX Insights on-premises Projects Reference Guide*.

The Chat folder contains numerous attributes that you can use to build chat-related reports.

Note the following:

• When creating attributes, any forms you create must have a one-is-to-one mapping relationship. For example, an attribute that represents the name of a customer can have only one phone number form associated with it.

Important

Objects in each folder or subfolder are designed to be used together to create reports. Avoid mixing attributes and metrics from multiple folders into your reports. One exception to this rule is objects in the Time folder; Time attributes can be used in any report, and most reports include at least one attribute from the Time folder.

The following Attributes are available in this folder and are described on this page.

Chat

• Ended By

• Media Origin

• End Reason

• Language Name

Mode

Chat > Agent

Chat > Async

Chat > Thread

- · Agent Group
- Agent Name

- There are no attributes in this folder
- Media Origin

Folder: Chat

Attribute name: End Reason

Introduced: 9.0.011

Folder: Chat

Description: Enables data to be organized based on the reason why the chat ended.

Attribute name: Ended By

Introduced: 9.0.011

Folder: Chat

Description: Enables data to be organized based on what party ended the interaction (agent, customer, or timeout).

Attribute name: Language Name

Introduced: 9.0.011

Folder: Chat

Description: Enables data to be organized based on the language used in the chat interaction.

Attribute name: Media Origin

Introduced: 9.0.011

Folder: Chat

Description: Enables data to be organized by where the chat session originated—for example, CHAT, Facebook, Twitter, or SMS.

Attribute name: Mode

Introduced: 9.0.011

Folder: Chat

Description: Enables data to be organized by the mode (Regular or Async).

Folder: Chat > Agent

Attribute name: Agent Group Folder: Chat > Agent

Description: Enables data within the reporting interval to be organized by the groups to which agents belong. An agent can belong to more than one agent group.

Attribute name: Agent Name	Folder: Chat > Agent
Description: Enables data to be organize interaction.	ed by certain attributes of the agent who is associated with the
Form(s): User Name, Last Name, First Name, Employee ID	
Forms in this attribute:	
Form: Agent Name Table.Column: Data type:	Description: Enables data to be organized by the agent name.
Form: Employee ID Table.Column: RESOURCE_A.EMPLOYEE_ID Data type: Text	Description: Enables data to be organized by the Employee ID of the agent who is associated with the interaction.
Form: First Name Table.Column: RESOURCE_A.AGENT_FIRST_NAME Data type: Text	Description: Enables data to be organized by the first name of the agent who is associated with the interaction.
Form: Last Name Table.Column: RESOURCE_A.AGENT_LAST_NAME Data type: Text	Description: Enables data to be organized by the last name of the agent who is associated with the interaction.
Form: User Name Table.Column: RESOURCE_A.RESOURCE_NAME Data type: Text	Description: Enables data to be organized by the user name of the agent who is associated with the interaction.
