Important

Use this document for Genesys CX Insights Multicloud deployments. For information relevant to Genesys CX Insights on-premises deployments, see the corresponding page in the *Genesys CX Insights on-premises Projects Reference Guide*.

The Detail folder contains numerous metrics that you can use to build reports that describe low-level interaction and agent details.

Note the following:

- Unless otherwise noted, metrics that show time, display a whole integer representing the number of seconds.
- For detailed information about the different metric types, see [About Genesys CX Insights Projects](#).

Important

Objects in each folder or subfolder are designed to be used together to create reports. Avoid mixing attributes and metrics from multiple folders into your reports. One exception to this rule is objects in the Time folder; Time attributes can be used in any report, and most reports include at least one attribute from the Time folder.

The following Metrics are available in this folder and are described on this page.

Folder: Detail

There are no metrics in this folder.

Folder: Detail > Handling Attempt

Folder:

Metric name: Abandoned Waiting		Detail > Handling Attempt
Description: The total number of customer interactions that were abandoned or stopped for any reason while the interactions were waiting for the first handling resource.		
Calculation:		Used in: This metric is not used in any reports.
Media type: All		
Data type: Number Metric type: Detail		
Metric name: Abandoned Waiting Time		Folder: Detail > Handling Attempt
Description: The total amount of time associated with customer interactions were abandoned or dropped for any reason before the interactions could be distributed.		
Calculation:		Used in: This metric is not used in any reports.
Media type: All		
Data type: Number Metric type: Detail		
Metric name: Conference Initiated Time		Folder: Detail > Handling Attempt
Description: The amount of time that a conference initiated by the IRF resource was connected (established). Duration applies only to the portion of the IRF that represents the IRF resource as a conference initiator.		
Calculation:		Used in: <ul style="list-style-type: none"> Interaction Handling Attempt Report
Media type: All (except Email)		
Data type: Number Metric type: Detail		
Metric name: Conference Received Time		Folder: Detail > Handling Attempt
Description: The amount of time, in seconds, that a conference that was joined by the IRF resource was connected (established). Duration applies only to the portion of the IRF that represents the IRF resource as a conference joiner.		
Calculation:		Used in:

Media type: All (except Email) Data type: Number Metric type: Detail		<ul style="list-style-type: none"> Interaction Handling Attempt Report
---	--	---

Metric name: Consult Initiated Time Introduced: 100.0.027.0001	Folder: Detail > Handling Attempt
Description: The amount of time, in seconds, that a consult initiated by the IRF resource was connected (established). Duration applies only to the portion of the IRF that represents the IRF resource as a conference initiator.	
Calculation:	
Media type: All (except Email) Data type: Number Metric type: Detail	Used in: This metric is not used in any reports.

Metric name: Customer Alert Time	Folder: Detail > Handling Attempt
Description: This metric varies depending on the media type: <ul style="list-style-type: none"> For voice interactions, the number of seconds that the interaction was ringing at the resource during a voice handling attempt while a customer was present. For multimedia interactions, the number of seconds that the customer-related interaction was alerting at the resource during an interaction handling attempt. For e-mail interactions, this metric includes agent's handling of an inbound e-mail from a customer or an internal e-mail from another agent, or handling a reply e-mail back to the customer. This metric excludes handling a collaboration, whether on the initiating or receiving side.	
Calculation:	
Media type: All Data type: Number Metric type: Detail	Used in: <ul style="list-style-type: none"> Interaction Handling Attempt Report

Metric name: Customer Dial Time	Folder: Detail > Handling Attempt
Description: The amount of time that the IRF resource spent initiating an outbound, customerrelated interaction. The duration starts when the dialing event is sent, includes the mediation time that the initiator incurs while waiting for the target resource to connect, and ends when the call is either established or terminated on no answer. Initiated consultations are excluded from consideration.	

Calculation:		Used in:
Media type: Voice		
Data type: Number		<ul style="list-style-type: none"> Interaction Handling Attempt Report
Metric type: Detail		
Metric name: Customer Engage Time		Folder:
		Detail > Handling Attempt
<p>Description: The amount of time that the agent processed a customer-related interaction at this resource during an interaction handling attempt. This metric includes internal interactions.</p> <ul style="list-style-type: none"> For synchronous interactions, this is the time that the agent spent interacting with a customer. The duration includes talk duration of conferenced interactions. For asynchronous interactions, this is the time that the agent spent handling an inbound interaction from a customer, handling an internal interaction from another agent, or handling a reply interaction back to the customer. <p>This duration excludes consultations and collaborations, whether they were initiated or received.</p>		
Calculation:		Used in:
Media type: All		
Data type: Number		<ul style="list-style-type: none"> Interaction Handling Attempt Report
Metric type: Detail		
Metric name: Customer Handle Time		Folder:
		Detail > Handling Attempt
Description:		
<p>Calculation: Calculated as the sum of INTERACTION_RESOURCE_FACT_GI2.CUSTOMER_TALK_DURATION + INTERACTION_RESOURCE_FACT_GI2.CUSTOMER_HOLD_DURATION + INTERACTION_RESOURCE_FACT_GI2.CUSTOMER_ACW_DURATION</p>		Used in: <ul style="list-style-type: none"> Interaction Handling Attempt Report
Media type: All		
Data type: Number		
Metric type: Detail		
Metric name: Customer Hold Time		Folder:
		Detail > Handling Attempt
<p>Description: The amount of time that the agent had the customer on hold. This metric excludes hold durations that are associated with initiated or received consultations but includes hold duration of conferenced interactions.</p>		

Calculation:		Used in: <ul style="list-style-type: none">Interaction Handling Attempt Report
Media type: Voice		
Data type: Number Metric type: Detail		
Metric name: Customer Wrap Time		Folder: Detail > Handling Attempt
Description: The amount of time that the resource was in interaction-related After-Call-Work (ACW or Wrap) state that pertained to this customer voice-interaction resource. The duration excludes ACW duration that is associated with received consultations.		
Calculation:		Used in: <ul style="list-style-type: none">Interaction Handling Attempt Report
Media type: Voice		
Data type: Number Metric type: Detail		
Metric name: Interaction Duration		Folder: Detail > Handling Attempt
Description: The difference between the beginning and end of the agent's interaction-related state.		
Calculation: Calculated as the difference between INTERACTION_FACT_GI2.END_TS and INTERACTION_FACT_GI2.START_TS.		Used in: <ul style="list-style-type: none">Interaction Handling Attempt Report
Media type: All		
Data type: Number Metric type: Date		
Metric name: Queue Time		Folder: Detail > Handling Attempt
Description: The sum of the durations that interactions spent at ACD queue resources prior to arrival at the IRF resource. This duration excludes abandoned-while-queued interactions.		
Calculation:		Used in: <ul style="list-style-type: none">Interaction Handling Attempt Report
Media type: All		
Data type: Number Metric type: Detail		
Metric name: Response Time		Folder: Detail > Handling Attempt
Description: The time that elapsed before the customer received service or abandoned the interaction,		

including the time that the interaction spent in a queue (including routing points and non-self-service IVR ports) prior to abandonment or reaching a handling resource (agent or self-service IVR) as well as the alert duration at the resource prior to the interaction being accepted.

Additionally, this metric includes the mediation duration of any immediate previous attempt to deliver the interaction that was redirected with a technical result of RoutedOnNoAnswer or Unspecified, as well as the alert duration that is associated with this attempt. Received consultations and collaborations are excluded from consideration.

Calculation: Calculated as the sum of
INTERACTION_RESOURCE_FACT_GI2.PREVIOUS_MEDIATION_DURATION
+ INTERACTION_RESOURCE_FACT_GI2.MEDIATION_DURATION
+ INTERACTION_RESOURCE_FACT_GI2.RING_DURATION.
