Important

Use this document for Genesys CX Insights Multicloud deployments. For information relevant to Genesys CX Insights on-premises deployments, see the corresponding page in the *Genesys CX Insights on-premises Projects Reference Guide*.

The Queue folder contains numerous metrics that you can use to build queue-related reports.

Note the following:

- Unless otherwise noted, metrics that show time, display a whole integer representing the number of seconds.
- For detailed information about the different metric types, see *About Genesys CX Insights Projects*.

Important

Objects in each folder or subfolder are designed to be used together to create reports. Avoid mixing attributes and metrics from multiple folders into your reports. One exception to this rule is objects in the Time folder; Time attributes can be used in any report, and most reports include at least one attribute from the Time folder.

The following Metrics are available in this folder and are described on this page.

- There are no metrics in this folder

Folder: Queue

Metric name: % Abandoned Inviting	Folder: Queue
<p>Description: The description of this metric depends on attributes or filters in the report query:</p> <ul style="list-style-type: none"> • Queue Attribute: The percentage of interactions that entered this queue, were distributed to a resource, and were subsequently abandoned while they were alerting/ringing at an agent’s DN, relative to the total number of interactions that entered this queue and were subsequently offered to a resource. • Queue Group Attribute: The percentage of interactions that entered queues that belong to this queue group, were distributed to a resource, and were subsequently abandoned while they were alerting/ringing at an agent’s DN, relative to the total number of interactions that entered queues that belong to this queue group and were subsequently offered to a resource. 	

This metric relies on the value of the **short-abandoned threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Abandoned Inviting and Queue > Q Customer > Offered metrics.

Media type: Voice, Chat, Open (sync)

Data type: Number
Metric type: Disposition

Used in:

- Queue Report

Metric name: % Abandoned Waiting

Folder:

Queue

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The percentage of customer interactions that both entered this queue and were subsequently abandoned before the interactions could be distributed, relative to the total number of interactions that entered this queue.
- Queue Group Attribute: The percentage of customer interactions that both entered queues that belong to this queue group and were subsequently abandoned before the interactions could be distributed, relative to the total number of interactions that entered a queue that belongs to this queue group.

This metric relies on the value of the **short-abandoned threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Abandoned Waiting and Queue > Q Customer > Entered metrics.

Media type: Voice, Chat, Open (sync)

Data type: Number
Metric type: Disposition

Used in:

- Interaction Traffic Report
- Predictive Routing Queue Statistics Report
- Queue Dashboard
- Queue Report
- Queue Summary Report

Metric name: % Accept Service Level

Folder:

Queue

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The service level of this queue measured as a percentage of interactions that entered this queue and were accepted within the acceptance threshold, relative to all interactions that entered this queue and were offered to a resource.
- Queue Group Attribute: percentage of interactions that entered queues that belong to this queue group and were accepted within the acceptance threshold to all interactions that entered queues that belong, relative to this queue group and were offered to a resource.

This metric yields results other than 0 only for interactions that were accepted by an agent. This metric relies on the value of the **acceptance threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Accepted in Threshold and Queue > Q Customer > Offered metrics.		Used in: <ul style="list-style-type: none"> • Interaction Traffic Group Report • Interaction Traffic Report • Predictive Routing - AHT & QUEUE • Predictive Routing Queue Statistics Report • Queue Dashboard • Queue Report • Queue Summary Report
Media type: All	Data type: Number Metric type: Disposition	

Metric name: % Accepted	Folder: Queue
--------------------------------	-------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The percentage of customer interactions and warm consultations that entered this queue and were subsequently distributed and accepted, relative to the total number of interactions that entered this queue.
- Queue Group Attribute: The percentage of customer interactions and warm consultations that entered queues that belong to this queue group and were subsequently distributed and accepted, relative to the total number of interactions that entered queues that

belong to this queue group. This metric relies on the value of the **acceptance threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Accepted and Queue > Q Customer > Offered metrics.		Used in: <ul style="list-style-type: none"> • Queue Dashboard • Queue Report
Media type: All	Data type: Number Metric type: Disposition	

Metric name: % Accepted Agent	Folder: Queue
--------------------------------------	-------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The percentage of customer interactions or warm consultations that entered this queue and were subsequently distributed and accepted by an agent, relative to the total number of interactions that entered this queue and were offered to a resource.
- Queue Group Attribute: The percentage of customer interactions or warm consultations that entered queues that belong to this queue group and were subsequently distributed and accepted by an agent, relative to the total number of interactions that entered queues that belong to this queue group and were offered to a resource.

This metric relies on the value of the **acceptance threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Accepted Agent and Queue > Q Customer > Offered metrics.

Media type: All

Data type: Number
Metric type: Disposition

Used in:

- Interaction Traffic Report

Metric name: % Short Abandoned Waiting

Folder:

Queue

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The percentage of customer interactions that entered this queue and were abandoned within a specific threshold, relative to the total number of customer interactions that entered this queue and were abandoned.
- Queue Group Attribute: The percentage of customer interactions that entered queues that belong to this queue group and were abandoned within a specific threshold, relative to the total number of customer interactions that entered queues that belong to this queue group and were abandoned.

The count excludes interactions that were abandoned after distribution. This metric relies on the value of **short-abandoned threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Short Abandoned Waiting and Queue > Entered metrics.

Media type: Voice, Chat, Open (sync)

Data type: Number
Metric type: Disposition

Used in:

This metric is not used in any reports.

Metric name: % Transfer Initiated

Folder:

Queue

Description: The percentage of accepted customer interactions that were transferred (warm or blind) by this agent.

Calculation: Calculated based on the Queue > Transfer Initiated Agent and Queue > Accepted metrics

Media type: All

Data type: Number
Metric type: Disposition

Used in:

- Queue Dashboard
- Queue Report

Metric name: % Transfer Initiated Agent

Folder:

Queue

Description: Of the customer interactions that entered this queue (or queue in this queue group) and were distributed/accepted, the percentage that were transferred (warm or blind) by agents.	
Calculation: Calculated based on the Queue > Transfer Initiated Agent and Queue > Accepted Agent metrics.	Used in: • Queue Summary Report
Media type: All Data type: Number Metric type: Disposition	

Metric name: Abandoned Inviting	Folder: Queue
--	-----------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of times that customer interactions that were distributed or pulled from this queue were abandoned or dropped for any reason while the interactions were alerting or ringing at an agent.
- Queue Group Attribute: The total number of times that customer interactions that were distributed or pulled from queues that belong to this queue group were abandoned or dropped for any reason while the interactions were alerting or ringing at an agent.

Calculation:		Used in: • Queue Outline Report
Media type: Voice, Chat, Open (sync) Data type: Number Metric type: Disposition		

Metric name: Abandoned Waiting	Folder: Queue
---------------------------------------	-----------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of times that customer interactions entered this queue and were abandoned or dropped for any reason before the interactions could be distributed.
- Queue Group Attribute: The total number of times that customer interactions entered queues that belong to this queue group and were abandoned or dropped for any reason before the interactions could be distributed.

The count includes short-abandoned interactions and excludes interactions that were abandoned after distribution, such as abandoned-while-inviting interactions.

Calculation:		Used in: • Interaction Traffic Group Report • Interaction Traffic Report • Queue Outline Report
Media type: Voice, Chat, Open (sync) Data type: Number Metric type: Disposition		

		• Queue Summary Report
--	--	------------------------

Metric name: Abandoned Waiting Time	Folder: Queue
--	-------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total amount of time that customer interactions waited in this queue before they were abandoned or dropped for any reason and before the interactions could be distributed.
- Queue Group Attribute: The total amount of time that customer interactions waited in queues that belong to this queue group before they were abandoned or dropped for any reason and before the interactions could be distributed.

The duration starts the moment at which the interaction entered this queue and ends the moment at which the interaction was abandoned or stopped. The measurement includes short-abandoned interactions and excludes interactions that were abandoned after distribution.

Calculation:		Used in: This metric is not used in any reports.
Media type: Voice, Chat, Open (sync)		
Data type: Number Metric type: Disposition		

Metric name: Accept Time	Folder: Queue
---------------------------------	-------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total amount of time that customer interactions waited in this queue before they were accepted, answered, or pulled by handling resources.
- Queue Group Attribute: The total amount of time that customer interactions waited in a queue that belong to this queue group before they were accepted, answered, or pulled by handling resources.

The duration starts when interactions enter the queue and ends when the interactions are accepted by the target resource—thereby, including alert (ring) time.

Calculation:		Used in: This metric is not used in any reports.
Media type: All		
Data type: Number Metric type: Disposition		

Metric name: Accept Time Agent	Folder: Queue
---------------------------------------	-------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total amount of time that customer interactions waited in this queue before they were accepted, answered, or pulled by agents.
- Queue Group Attribute: The total amount of time that customer interactions waited in queues that belong to this queue group before they were accepted, answered, or pulled by agents.

Duration starts when the interaction enters the queue and ends when the interaction is accepted, answered, or pulled by an agent—thereby, including alert (ring) time.

Calculation:

Media type: All

Data type: Number

Metric type: Disposition

Used in:

This metric is not used in any reports.

Metric name: Accepted

Folder:

Queue

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of times that customer interactions and warm consultations that were distributed from this queue, were accepted, answered, or pulled by an agent, voice-treatment port, IVR port, or nonagent-associated DN (such as contact center resources that can alert).
- Queue Group Attribute: The total number of times that customer interactions and warm consultations that were distributed from queues that belong to this queue group, were accepted, answered, or pulled by an agent, voice-treatment port, IVR port, or nonagent-associated DN.

Calculation:

Media type: All

Data type: Number

Metric type: Disposition

Used in:

- Interaction Traffic Group Report
- Interaction Traffic Report
- Predictive Routing - AHT & QUEUE

- Queue Report
- Queue Summary Report

Metric name: Accepted Agent

Folder:

Queue

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of times that customer interactions or warm consultations that

were distributed from this queue, were accepted, answered, or pulled by an agent.

- Queue Group Attribute: The total number of times that customer interactions or warm consultations that were distributed from queues that belong to this queue group, were accepted, answered, or pulled by an agent.

Calculation:

Media type: All

Data type: Number
Metric type: Disposition

Used in:

- Queue Outline Report

Metric name: Accepted in Threshold

Folder:

Queue

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of times that customer interactions or established warm consultations that were distributed from this queue were accepted, answered, or pulled by a handling resource within the acceptance threshold.
- Queue Group Attribute: The total number of times that customer interactions or established warm consultations that were distributed from queues that belong to this queue group were accepted, answered, or pulled by a handling resource within the acceptance threshold.

This metric relies on the value of the **acceptance threshold** configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation:

Media type: All

Data type: Number
Metric type: Disposition

Used in:

- Queue Dashboard
- Queue Report

Metric name: Accepted Others

Folder:

Queue

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of interactions that entered this queue and were subsequently distributed and accepted, answered, or pulled by a resource other than an agent, place DN, or extension DN.
- Queue Group Attribute: The total number of interactions that entered queues that belong to this queue group and were subsequently distributed and accepted, answered, or pulled by a resource other than an agent, place DN, or extension DN.

This metric is calculated as the difference between the total number of interactions that were accepted, answered, or pulled and the total number of interactions that were accepted, answered, or pulled by an agent resource.

Calculation: Calculated based on the Queue > Accepted and Queue > Accepted Agent metrics.

Used in:

Media type: All Data type: Number Metric type: Disposition		<ul style="list-style-type: none"> Queue Outline Report
Metric name: ASA		Folder: Queue
Description: The description of this metric depends on attributes or filters in the report query: <ul style="list-style-type: none"> Queue Attribute: The average amount of time, in seconds, that customers waited before their interactions—distributed from this queue—were accepted by a handling resource. Queue Group Attribute: The average amount of time, in seconds, that customers waited before their interactions—distributed from queues that belong to the queue group—were accepted by a handling resource. <p>This metric is identical to Queue\Avg Accept Time.</p>		
Calculation: Calculated based on the Queue > Accept Time and Queue > Accepted metrics.		Used in: This metric is not used in any reports.

Metric name: ASA (Fmt)		Folder: Queue
Description: The description of this metric depends on attributes or filters in the report query: <ul style="list-style-type: none"> Queue Attribute: The average amount of time, in HH:MM:SS, that customers waited before their interactions—distributed from this queue—were accepted by a handling resource. Queue Group Attribute: The average amount of time, in HH:MM:SS, that customers waited before their interactions—distributed from queues that belong to the queue group—were accepted by a handling resource. <p>This metric is identical to Queue\Avg Accept Time.</p>		
Calculation: Calculated based on the Queue > Accept Time and Queue > Accepted metrics.		Used in: <ul style="list-style-type: none"> Queue Dashboard Queue Report
Media type: All Data type: Number Metric type: Disposition		
Metric name: Avg Abandoned Waiting Time		Folder: Queue

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The average amount of time that customer interactions spent at this queue before they were abandoned or dropped for any reason.
- Queue Group Attribute: The average amount of time that customer interactions spent at queues that belong to this queue group before they were abandoned or dropped for any reason.

This average includes the duration and count of short-abandoned interactions.

Calculation: Calculated based on the Queue > Abandoned Waiting Time and Queue > Abandoned Waiting metrics.

Used in:

- Interaction Traffic Group Report
- Interaction Traffic Report
- Queue Dashboard
- Queue Report
- Queue Summary Report

Media type: Voice, Chat, Open (sync)

Data type: Number
Metric type: Disposition

Metric name: Avg Accept Time

Folder:

Queue

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The average amount of time that customers waited before their interactions—distributed from this queue—were accepted by a handling resource.
- Queue Group Attribute: The average amount of time that customers waited before their interactions—distributed from queues that belong to the queue group—were accepted by a handling resource.

This metric is identical to the Queue > ASA metric.

Calculation: Calculated based on the Queue > Accept Time and Queue > Accepted metrics.

Used in:

- Interaction Traffic Group Report
- Interaction Traffic Report
- Predictive Routing - AHT & QUEUE
- Predictive Routing Queue Statistics Report
- Queue Summary Report

Media type: All

Data type: Number
Metric type: Disposition

Metric name: Avg Accept Time Agent

Folder:

Queue

Description: The average amount of time that customer interactions waited in this queue or queue group before they were accepted by agents. This duration includes alert (ring) time.

Calculation: Calculated based on the Queue > Accept Time Agent and Queue > Accepted Agent metrics.		Used in: This metric is not used in any reports.
Media type: All		
Data type: Number		
Metric type: Disposition		

Metric name: Avg Consult Received Time	Folder: Queue
---	-------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The average amount of time that agents were engaged in collaborations or consultations that were distributed from this queue, where the agents were the recipients of the collaboration/consultation requests.
- Queue Group Attribute: The average amount of time that agents were engaged in collaborations or consultations that were distributed from queues that belong to this queue group, where the agents were the recipients of the collaboration/consultation requests.

Calculation: Calculated based on the Queue > Consult Received Time, Consult Received Warm Time, Consult Received Accepted, and Consult Received Accepted Warm metrics.		Used in: This metric is not used in any reports.
Media type: All (except Chat)		
Data type: Number		
Metric type: Disposition		

Metric name: Avg Consult Received Warm Time	Folder: Queue
--	-------------------------

Description: The average amount of time that this agent was engaged as a recipient in collaborations or consultations, including related hold durations, where the collaborations/consultations were distributed or pulled from this queue and associated with customer interactions.

This metric is attributed to the interval in which the consult interaction is offered to the receiving agent. This metric excludes alert (ring) and ACW (Wrap) durations associated with the consult interactions.

Calculation: Calculated based on the Queue > Consult Received Warm Time and Queue > Consult Received Accepted Warm metrics.		Used in: This metric is not used in any reports.
Media type: Voice		
Data type: Number		
Metric type: Disposition		

Metric name: Avg Consult Received Warm Wrap Time	Folder: Queue
---	-------------------------

<p>Description: The average amount of time that this agent spent in ACW state following consultations that the agent requested and received, where the consultations were distributed from this queue and associated with customer interactions that were transferred to or conferenced with the agent.</p> <p>This metric includes:</p> <ul style="list-style-type: none"> • ACW durations that were associated with conferences where the customer leaves the interaction • Internal interactions that were transferred to the agent

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total amount of time that simple consult interactions spent in a queue before they were cleared from this virtual queue, workbin, or interaction queue.
- Queue Group Attribute: The total amount of time that simple consult interactions spent in a queue before they were cleared from a virtual queue, workbin, or interaction queue that belong to this queue group.

Interactions can be cleared for many reasons, including:

- Distribution to a parallel virtual queue.
- Default routed by the switch.
- Default routed by a routing strategy.
- Removing interactions that are determined to be stuck.
- Removing interactions for any other reason, such as abnormal stops.
- Removing interactions from a virtual queue by using the URS ClearTargets function.

But excluding:

- Interactions that the customer abandoned while still queued.
- Interactions that were distributed from this virtual queue, workbin, or interaction queue.
- Interactions that were queued for consultation or collaboration.

Calculation:

Media type: All (except Chat)

Data type: Number
Metric type: Disposition

Used in:

This metric is not used in any reports.

Metric name: Consult Cleared	Folder: Queue > Q Consults
-------------------------------------	--------------------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of times that simple consult interactions were cleared from this virtual queue, workbin, or interaction queue.
- Queue Group Attribute: The total number of times that simple consult interactions were cleared from virtual queues, workbins, or interaction queues that belong to this queue group.

Interactions can be cleared for many reasons, including:

- Distribution to a parallel virtual queue.
- Default routed by the switch.
- Default routed by a routing strategy.
- Removing interactions that are determined to be stuck.
- Removing interactions for any other reason, such as abnormal stops.
- Removing interactions from a virtual queue by using the URS ClearTargets function.

But excluding:

- Interactions that the customer abandoned while still queued.
- Interactions that were distributed from this virtual queue, workbin, or interaction queue.
- Interactions that were queued for consultation or collaboration.

Calculation:

Media type: All (except Chat)

Data type: Number
Metric type: Disposition

Used in:

- Queue Outline Report

Metric name: Consult Distribute Time

Folder:

Queue > Q Consults

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The amount of time from the moment at which simple consult interactions entered this queue to the moment at which they were distributed or pulled from this queue.
- Queue Group Attribute: The amount of time from the moment at which simple consult interactions entered queues that belong to this queue group to the moment at which were distributed or pulled from the queues.

Calculation:

Media type: All (except Chat)

Data type: Number
Metric type: Disposition

Used in:

This metric is not used in any reports.

Metric name: Consult Distributed

Folder:

Queue > Q Consults

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of times that simple consult interactions were distributed or pulled from this queue.
- Queue Group Attribute: The total number of times that simple consult interactions were distributed or pulled from queues that belong to this queue group.

Calculation:

Media type: All (except Chat)

Data type: Number
Metric type: Disposition

Used in:

- Queue Outline Report

Metric name: Consult Entered

Folder:

Queue > Q Consults

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of times that simple consultation requests entered this queue where the collaborations/consultations were associated with customer interactions.
- Queue Group Attribute: The total number of times that simple consultation requests entered queues that belong to this queue group where the collaborations/consultations were associated with customer interactions.

Calculation:

Media type: All (except Chat)

Data type: Number
Metric type: Disposition

Used in:

- Queue Outline Report

Metric name: Consult Not Accepted

Folder:

Queue > Q Consults

Description: The total number of times that simple consult interactions entered this queue (or queue group), alerted at a routing target, and were subsequently either rejected by the agent or abandoned by the customer while the interactions were alerting at the agent's DN.

Calculation: Calculated as the sum of the Queue > Q Consults > Consult Redirected and Queue > Q Consults > Consult Abandoned Inviting metrics.

Media type: All (except Chat)

Data type: Number
Metric type: Disposition

Used in:

This metric is not used in any reports.

Metric name: Consult Offered

Folder:

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total number of consultation requests that entered this queue and were offered to a resource excluding interactions that were abandoned within the short-abandoned threshold, where the collaborations/consultations were associated with customer interactions.
- Queue Group Attribute: The total number of consultation requests that entered queues that belong to this queue group and were offered to a resource excluding interactions that were abandoned within the short-abandoned threshold, where the collaborations/consultations were associated with customer interactions.

This metric:

- includes handling attempts that agents rejected as well as warm consultations, conferences, and collaborations that agents received.
- excludes consultation requests for which no threshold was set by Router, and consultation requests for which no service objective was set.
- relies on the value of the **Short-abandoned threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Consult Entered and Queue > Consult Short Abandoned Waiting metrics.

Metric name: Consult Received Warm Hold Time		Folder: Queue > Q Consults
<p>Description: The description of this metric depends on attributes or filters in the report query:</p>		

- **Queue Attribute:**The total amount of time that agents had consultations on hold where the interactions were distributed or pulled from this queue and associated with customer interactions, the agents were the recipients of the consultation requests, and the interactions were transferred to or conferenced with the agents.
- **Queue Group Attribute:** The total amount of time that agents had consultations on hold where the interactions were distributed or pulled from queues that belong to this queue group and associated with customer interactions, the agents were the recipients of the consultation requests, and the interactions were transferred to or conferenced with the agents.

Calculation:

Media type: Voice
Data type: Number
Metric type: Disposition

Used in:

This metric is not used in any reports.

Metric name: Consult Received Warm Time

Folder:

Queue > Q Consults

Description: The description of this metric depends on attributes or filters in the report query:

- **Queue Attribute:**The total amount of time that agents were engaged as recipients in collaborations or consultations, including any related hold durations, where the collaborations/consultations were distributed or pulled from this queue and directly associated with customer interactions.
- **Queue Group Attribute:** The total amount of time that agents were engaged as recipients in collaborations or consultations, including any related hold durations, where the collaborations/consultations were distributed or pulled from queues that belong to this queue group and the collaborations/consultations were directly associated with customer interactions.

This metric is attributed to the interval in which interactions entered the queue. Time begins when the collaboration or consultation is accepted by the receiving agent and ends when the customer interaction is transferred to or conferenced with the agent. This metric excludes alert (ring) and ACW durations associated with the collaborations/consultations.

Calculation: Calculated as
 AG2_QUEUE_[*].CONSULT_RCV_WARM_ENGAGE_TIME plus
 AG2_QUEUE_[*].CONSULT_RCV_WARM_HOLD_TIME, or as
 AG2_QUEUE_GRP_[*].CONSULT_RCV_WARM_ENGAGE_TIME +
 AG2_QUEUE_GRP_[*].CONSULT_RCV_WARM_HOLD_TIME

Metric type: Disposition

Metric name: Consult Received Warm Wrap

Folder:

Queue > Q Consults

Description: The description of this metric depends on attributes or filters in the report query:

- **Queue Attribute:** The total number of consultations that agents received for which agents entered ACW state where the consultations were distributed from this queue and were associated with

customer interactions, and the interactions were transferred to or conferenced with the agents.

- Queue Group Attribute: The total number of consultations that agents received for which agents entered ACW state where the consultations were distributed from queues that belong to this queue group and were associated with customer interactions, and the interactions were transferred to or conferenced with the agents.

In common call-flow scenarios, this metric yields a value of zero.

Calculation:

Media type: Voice

Data type: Number

Metric type: Disposition

Used in:

This metric is not used in any reports.

Metric name: Consult Received Warm Wrap Time

Folder:

Queue > Q Consults

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The total amount of time that agents spent in ACW (Wrap) state following consultations that the agents requested and received, where the consultations were distributed from this queue and associated with customer interactions, and the interactions were transferred to or conferenced with the agents.
- Queue Group Attribute: The total amount of time that agents spent in ACW state following consultations that the agents requested and received, where the consultations were distributed from queues that belong to this queue group and were associated with customer interactions, and the interactions were transferred to or conferenced with the agents.

This metric includes:

- ACW durations that were associated with conferences, where the customer leaves the interactions.
- Internal interactions that were transferred to the agents.

In common call-flow scenarios, this metric yields a value of zero.

Metric name: % Abandoned Inviting

Folder:

Queue > Q Customer

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The percentage of interactions that entered this queue, were distributed to a resource, and were subsequently abandoned while they were alerting/ringing at an agent's DN, relative to the total number of interactions that entered this queue and were subsequently offered to a resource.
- Queue Group Attribute: The percentage of interactions that entered queues that belong to this queue group, were distributed to a resource, and were subsequently abandoned while they were alerting/ringing at an agent's DN, relative to the total number of interactions that entered queues that belong to this queue group and were subsequently offered to a resource.

This metric relies on the value of the **short-abandoned threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Abandoned Inviting and Queue > Q Customer > Offered metrics.

Media type: Voice, Chat, Open (sync)

Data type: Number
Metric type: Disposition

Used in:

- Queue Report

Metric name: % Abandoned Waiting

Folder:

Queue > Q Customer

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The percentage of customer interactions that both entered this queue and were subsequently abandoned before the interactions could be distributed, relative to the total number of

interactions that entered this queue.

- Queue Group Attribute: The percentage of customer interactions that both entered queues that belong to this queue group and were subsequently abandoned before the interactions could be distributed, relative to the total number of interactions that entered a queue that belongs to this queue group.

This metric relies on the value of the **short-abandoned threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Abandoned Waiting and Queue > Q Customer > Entered metrics.

Used in:

- Interaction Traffic Report
- Predictive Routing Queue Statistics Report
- Queue Dashboard
- Queue Report
- Queue Summary Report

Media type: Voice, Chat, Open (sync)

Data type: Number
Metric type: Disposition

Metric name: % Accept Service Level

Folder:

Queue > Q Customer

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The service level of this queue measured as a percentage of interactions that entered this queue and were accepted within the acceptance threshold, relative to all interactions that entered this queue and were offered to a resource.
- Queue Group Attribute: percentage of interactions that entered queues that belong to this queue group and were accepted within the acceptance threshold to all interactions that entered queues that belong, relative to this queue group and were offered to a resource.

This metric yields results other than 0 only for interactions that were accepted by an agent. This metric relies on the value of the **acceptance threshold** as configured in the **[agg-gim-thld-QUEUE-IXN]** section.

Calculation: Calculated based on the Queue > Accepted in Threshold and Queue > Q Customer > Offered metrics.

Used in:

- Interaction Traffic Group Report
- Interaction Traffic Report
- Predictive Routing - AHT & QUEUE
- Predictive Routing Queue Statistics Report
- Queue Dashboard
- Queue Report

---------------------------------	------------------------

Metric name: Max Clear Time	Folder: Queue > Q Customer
------------------------------------	--------------------------------------

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The longest amount of time (seconds) that customer interactions spent in a queue before they were cleared from this virtual queue, workbin, or interaction queue.
- Queue Group Attribute: The longest amount of time (seconds) that customer interactions spent in a queue before they were cleared from virtual queues, workbins, or interaction queues that belong to this queue group.

Interactions can be cleared for many reasons, including:

- Distribution to a parallel virtual queue.
- Default routed by the switch.
- Default routed by a routing strategy.
- Removing interactions that are determined to be stuck.
- Removing interactions for any other reason, such as abnormal stops.
- Removing interactions from a virtual queue by using the URS ClearTargets function.

But excluding:

- Interactions that the customer abandoned while still queued.
- Interactions that were distributed from this virtual queue, workbin, or interaction queue.
- Interactions that were queued for consultation or collaboration.

- Queue Report

Metric name: Max Distribute Time

Folder:

Queue > Q Customer

Description: The description of this metric depends on attributes or filters in the report query:

- Queue Attribute: The longest amount of time (seconds) that customer interactions or warm consultations spent in this queue before being distributed.
- Queue Group Attribute: The longest amount of time (seconds) that customer interactions or warm consultations spent in queues that belong to this queue group before being distributed.

Distribution includes interactions that were:

- Distributed to another queue.
- Distributed to an unmonitored resource.
- Accepted, answered, or pulled.
- Rejected/redirected upon no answer.
- Abandoned by the customer while they were alerting at the agent.

If the interaction passes through more than one queue before it was distributed, the count is increased only for that device from which the interaction was distributed or pulled.

Metric name: Hold		Folder: Queue > Q Customer & Consults
Description: The sum of the values of (customer) Hold and Consult Hold metrics.		Used in: This metric is not used in any reports.
Calculation: Calculated based on the Queue > Hold, Queue > Q Consults > Consult Received Hold, and Queue > Q Consults > Consult Received Warm Hold metrics.		
Media type: Voice	Data type: Number Metric type: Disposition	
Metric name: Hold Time		Folder: Queue > Q Customer & Consults
Description: The sum of the values of (customer) Hold Time and Consult Hold Time metrics.		Used in: This metric is not used in any reports.
Calculation: Calculated based on the Queue > Hold Time, Queue > Q Consults > Consult Received Hold Time, and Queue > Q Consults > Consult Received Warm Hold Time metrics.		
Media type: Voice	Data type: Number Metric type: Disposition	
Metric name: Invite		Folder: Queue > Q Customer & Consults
Description: The sum of the values of (customer) Invite and Consult Invite metrics.		Used in: This metric is not used in any reports.
Calculation: Calculated based on the Queue > Invite, Queue > Q Consults > Consult Received Invite, and Queue > Q Consults > Consult Received Invite Warm metrics.		
Media type: All	Data type: Number Metric type: Disposition	
		Folder:

Metric name: Invite Time		Queue > Q Customer & Consults
Description: The sum of the values of (customer) Invite Time and Consult Invite Time metrics.		
Calculation: Calculated based on the Queue > Invite Time, Queue > Q Consults > Consult Received Invite Time, and Queue > Q Consults > Consult Received Invite Warm Time metrics.		Used in:
Media type: All		This metric is not used in any reports.
Data type: Number Metric type: Disposition		
Metric name: Max Standard Abandoned Waiting Time		Folder: Queue > Q Customer & Consults
Description: The longest amount of time (in seconds) that customers waited at this queue (or queue group) before they abandoned the interactions and before the interactions could be distributed. This metric is identical to Queue > Q Customer > Max Abandoned Waiting Time.		
Calculation: Calculated based on the Queue > Max Abandoned Waiting Time metric.		Used in:
Media type: Voice, Chat, Open (sync)		This metric is not used in any reports.
Data type: Number Metric type: Disposition		
Metric name: Max Standard Abandoned Waiting Time (Fmt)		Folder: Queue > Q Customer & Consults
Description: The longest amount of time (HH:MM:SS) that customers waited at this queue (or queue group) before they abandoned the interactions and before the interactions could be distributed. This metric is identical to Queue > Q Customer > Max Abandoned Waiting Time.		
Calculation: Calculated based on the Queue > Max Abandoned Waiting Time metric.		Used in:
Media type: Voice, Chat, Open (sync)		This metric is not used in any reports.
Data type: Number Metric type: Disposition		
Metric name: Not Accepted		Folder:

		Queue > Q Customer & Consults
Description: The sum of (customer) Not Accepted and Consults Redirected metrics.		
Calculation: Calculated based on the Queue > Not Accepted and Queue > Q Consults > Consults Redirected metrics.		Used in: This metric is not used in any reports.
Media type: All		
Data type: Number		
Metric type: Disposition		
Metric name: Offered		Folder: Queue > Q Customer & Consults
Description: The sum of (customer) Offered and Consult Offered metrics.		
Calculation: Calculated based on the Queue > Offered and Queue > Q Consult > Consult Offered.		Used in: • Queue Outline Report
Media type: All		
Data type: Number		
Metric type: Disposition		
Metric name: Redirected		Folder: Queue > Q Customer & Consults
Description: The sum of (customer) Redirected and Consult Redirected metrics.		
Calculation: Calculated based on the Queue > Q Customer > Redirected and Queue > Q Consults > Consult Redirected metrics.		Used in: • Queue Outline Report
Media type: All		
Data type: Number		
Metric type: Disposition		
Metric name: Routed Other		Folder: Queue > Q Customer & Consults
Description: The sum of (customer) Routed Other and Consult Routed Other metrics.		
Calculation: Calculated based on the Queue > Routed Other and Queue > Q Consults > Consult Routed Other metrics .		Used in: • Queue Outline Report
Media type: All		
Data type: Number		
Metric type: Disposition		
		Folder:

Metric name: Short Abandoned Waiting		Queue > Q Customer & Consults
Description: The sum of (customer) Short Abandoned Waiting and Consult Short Abandoned Waiting metrics.		
Calculation: Calculated based on the Queue > Short Abandoned Waiting and Queue > Q Consults > Consult Short Abandoned Waiting metrics .		Used in: • Queue Outline Report
Media type: Voice, Chat, Open (sync)	Data type: Number Metric type: Disposition	
Metric name: Standard Abandoned Waiting		Folder: Queue > Q Customer & Consults
Description: The sum of (customer) Standard Abandoned Waiting and Consult Standard Abandoned Waiting metrics.		
Calculation: Calculated based on the Queue > Standard Abandoned Waiting and Queue > Q Consults > Consult Standard Abandoned Waiting metrics.		Used in: • Queue Outline Report
Media type: Voice, Chat, Open (sync)	Data type: Number Metric type: Disposition	
Metric name: Standard Abandoned Waiting Time		Folder: Queue > Q Customer & Consults
Description: The sum of the Q Customer > Standard Abandoned Waiting Time and Q Consult > Standard Abandoned Waiting Time metrics.		
Calculation: Calculated as the sum of the Q Customer > Standard Abandoned Waiting Time and Q Consult > Standard Abandoned Waiting Time metrics.		Used in: This metric is not used in any reports.
Media type: Voice, Chat, Open (sync)	Data type: Number Metric type: Disposition	
Metric name: Stuck		Folder: Queue > Q Customer & Consults
Description: The sum of (customer) Stuck and Consult Stuck metrics.		

<p>Calculation: Calculated based on the Queue > Stuck and Queue > Q Consults > Consult Stuck metrics.</p>		<p>Used in:</p> <ul style="list-style-type: none"> Queue Outline Report

Folder: Queue > Q Customer & Consults > Abandoned Waiting ST1

Metric name: % Abandoned Waiting ST 1-20		Folder: Queue > Q Customer & Consults > Abandoned Waiting ST1
Description: There are twenty of these metrics, % Abandoned Waiting ST1 - % Abandoned Waiting ST20, representing the percentage of interactions that entered this queue and were subsequently abandoned prior to the corresponding abandon-in-queue threshold value, relative to all interactions that entered this queue and were abandoned. This metric excludes interactions that were abandoned after distribution, but it includes short-abandoned interactions.		
Calculation: Calculated based on the > Q Customer & Consults > Abandoned Waiting ST > Abandoned Waiting ST metric and the value of AG2_QUEUE_ABN_[*].ABANDONED (where is a value between 1 and 20).		Used in:
Media type: Voice, Chat, Open (sync)		<ul style="list-style-type: none"> Abandon Delay Report
Data type: Number Metric type: Disposition		

Metric name: Abandoned Waiting		Folder: Queue > Q Customer & Consults > Abandoned Waiting ST1
Description: Total number of times that interactions entered this queue and were distributed and accepted, answered, or pulled by an agent.		
Calculation:		Used in:
Media type:		This metric is not used in any reports.
Data type: Metric type: Disposition		

Metric name: Abandoned Waiting ST 1-20		Folder: Queue > Q Customer & Consults > Abandoned Waiting ST1
Description: There are twenty of these metrics, Abandoned Waiting ST1- Abandoned Waiting ST20, representing the total number of times that interactions entered this queue and were subsequently abandoned prior to the first abandon threshold. If the corresponding abandon threshold is not configured, this metric uses no limit as the upper boundary of the abandon interval. Abandon thresholds are defined within the [agg-gim-thld-QUEUE-ABN] section.		
Calculation:		Used in:
Media type: Voice, Chat, Open (sync)		<ul style="list-style-type: none"> Abandon Delay Report

Folder: Queue > Q Customer & Consults > Accepted Agent ST1

Metric name: % Accepted Agent ST 1-20		Folder: Queue > Q Customer & Consults > Accepted Agent ST1
Description: There are twenty of these metrics, Abandoned Waiting ST1- Abandoned Waiting ST20, representing the percentage of interactions that entered this queue and were subsequently distributed and accepted by agents prior to the corresponding service time interval (1-20), relative to all customer interactions that entered this queue and were subsequently distributed and accepted by agents.		
Calculation: Calculated based on the > Q Customer & Consults > Abandoned Waiting ST > Accepted Agent ST metric and the value of AG2_QUEUE_ACC_AGENT_[*].ACCEPTED_AGENT (where is a value between 1 and 20).		Used in:
Media type: All		<ul style="list-style-type: none"> • Speed of Accept (hours) Report • Speed of Accept (seconds) Report
Data type: Number Metric type: Disposition		

Metric name: Accepted Agent		Folder: Queue > Q Customer & Consults > Accepted Agent ST1
Description: Total number of times that interactions entered this queue and were distributed and accepted, answered, or pulled by an agent.		
Calculation:		
Media type: All		Used in:
Data type: Number Metric type: Disposition		This metric is not used in any reports.

Metric name: Accepted Agent ST 1-20		Folder: Queue > Q Customer & Consults > Accepted Agent ST1
Description: There are twenty of these metrics, Abandoned Waiting ST1- Abandoned Waiting ST20, representing the total number of times that interactions entered this queue and were subsequently distributed and accepted, answered, or pulled by an agent prior to the first service time service time interval threshold. If the corresponding service time threshold is not defined, this metric uses no limit as the upper boundary of the service time interval.		

Speed-of-accept thresholds are defined within the [agg-gim-thld-QUEUE-ACC] section.
