Time folder and subfolders

> ### Important
> Use this document for Genesys CX Insights Multicloud deployments. For information relevant to Genesys CX Insights on-premises deployments, see the corresponding page in the *Genesys CX Insights on-premises Projects Reference Guide*.

The Time folder contains numerous objects that enable the organization and filtering of Info Mart data based on a range of time.

Many folders contain Custom folders, which are not described in this document; custom folders are provided to store any custom objects. This folder contains the following root folder and subfolders.

- Time

Folder: Time

Introduced: 9.0.007.03

Description: The root folder for time-related objects. All objects in this folder enable the organization and filtering of Info Mart data based on a range of time.
