## Understanding the Agent Performance Dashboard

Specially designed for contact center supervisors, the (**Dashboards** folder) Agent Performance Dashboard provides at-a-glance key information about agents, focusing on metrics related to handle time and agent conduct.

The dashboard is divided into two tabs, both of which illustrate the percentage of interactions accepted by each agent:

- **Handle Time** — Charts the average call handling statistics of each agent. In the Interactions Accepted by Agent section of the dashboard, click the bar next to an agent's name to see detailed bar charts of that agent's average handle time, average engage time, and various other related metrics, as well as a line graph that illustrates the number of interactions offered to and accepted by that agent over time (by day). You can:
  - From the **Media Type** list, select a media type to narrow the focus of the dashboard.
  - In the **Interactions Accepted by Agent** bar graph, click on any agent to focus the dashboard on that agent.
- **Conduct** — Charts the total volumes of calls handling by each agent, and illustrates how the agent handled interactions. In the Agents Rank by Interactions section of the dashboard, you can make a

---

selection in the drop-down list to filter the list of agents (to show, for example, agents with fewer than five interactions during the reporting period). Click the bar next to an agent's name to see detailed bar charts of that agent's total interactions offered and accepted, and various other related metrics, as well as a line graph that illustrates the number of interactions offered to and accepted by that agent over time (by day). You can:

- From the **Media Type** list, select a media type to narrow the focus of the dashboard.
- In the **Agents Rank by Interactions** bar graph, click on any agent to focus the dashboard on that agent.

To get a better idea of what this dashboard looks like, view sample output from the dashboard: [HRCXIAgentPerformanceDashboard.pdf](#)

The following tables explain the prompts you can select when you generate the dashboard, and the metrics that are represented in the dashboard:

## Prompts for the Agent Performance Dashboard

Prompt	Description
Pre-set Date Filter	From the list, choose a time period on which to report, and move it to the Selected list.
Start Date	Choose the first day from which to gather report data.
End Date	Choose the last day from which to gather report data.

## Attributes used in the Agent Performance Dashboard

Attribute	Description
Agent Name	This attribute enables data to be organized by certain attributes of the agent who is associated with the interaction.
Day	This attribute enables data within the reporting interval to be organized by a particular day within a month and year. Day values are presented in YYYY-MM-DD format.
Media Type	This attribute enables data to be organized by the interaction's media type—for example, Voice, Email, and Chat.
Interaction Type	This attribute enables data within the reporting interval to be organized by the type of interaction.

## Metrics used in the Agent Performance Dashboard

---

---

The Agent Performance Dashboard is divided into two tabs:

- Handle Time
- Conduct

Metric	Description
<b>Handle Time</b>	
Avg Handle Time (Fmt)	<p>The average amount of time (HH:MM:SS) that the agent spent handling interactions that the agent received.</p> <p>This metric is computed as handle time divided by the sum of accepted interactions and received consultations.</p>
Avg Engage Time (Fmt)	<p>The average amount of time (HH:MM:SS) that the agent was engaged with customers.</p>
Avg Wrap Time (Fmt)	<p>The average amount of time (HH:MM:SS) that the agent spent on customer interactions while in ACW (Wrap) state.</p>
Avg Hold Time (Fmt)	<p>The average amount of time (HH:MM:SS) that the agent had customer interactions on hold.</p> <p>This metric is attributed to the interval in which interactions arrived at the agent (which can differ from the interval in which the interactions were placed on hold).</p>
Avg Consult Received Wrap Time (Fmt)	<p>The average amount of time (HH:MM:SS) that the agent was in ACW (Wrap) state following simple consultations that the agent accepted, where the consultations were associated with customer calls.</p>
Avg Consult Received Warm Wrap Time (Fmt)	<p>The average amount of time (HH:MM:SS) that the agent spent in ACW (Wrap) state following consultations that the agent requested and received, where the consultations were associated with customer interactions that were transferred to or conferenced with the agent.</p>
Avg Consult Received Warm Time (Fmt)	<p>The average amount of time (HH:MM:SS) that the agent was engaged as a recipient in collaborations or consultations, including related hold durations, where the collaborations/consultations were associated with customer interactions.</p>
Avg Consult Received Time (Fmt)	<p>The average amount of time (HH:MM:SS) that the agent was engaged on collaborations or simple consultations that the agent received, where the collaborations/consultations were associated with customer interactions.</p>
Accepted	<p>The total number of customer interactions or warm consultations that were accepted, answered, pulled, or initiated by the agent.</p>
<b>Conduct</b>	
Offered	<p>The total number of interactions that were received or initiated by an agent.</p>

---

Metric	Description
	The count includes interactions that were abandoned while inviting, handling attempts that the agent rejected, and warm consultations and conferences that the agent received. This count excludes simple consultations, whether they were initiated or received. For AG2_AGENT_QUEUE records, this metric relies on the value of the <b>short-abandoned threshold</b> as configured in the <b>[agg-gim-thld-ID-IXN]</b> section.
Accepted	The total number of customer interactions or warm consultations that were accepted, answered, pulled, or initiated by the agent.
Not Accepted	The total number of customer interactions that were redirected to another resource upon no answer by the agent or were otherwise not accepted by the agent.
Rejected	The total number of customer interactions that alerted at the agent and were not accepted.
Hold	The total number of customer interactions that the agent had on hold.
Abandon Inviting	The total number of customer interactions that were abandoned or dropped for any reason while the interactions were alerting or ringing at the agent.
Avg Handle Time	The average amount of time (HH:MM:SS) that the agent spent handling interactions that the agent received.
Agent Disconnect First	The total number of times during the reporting interval that the agent released customer interactions before the other party did.
Transfer Initiated Agent	The total number of times that the agent transferred customer interactions.
% Transfer Initiated	The percentage of accepted customer interactions that were transferred (warm or blind) by the agent.
