This report provides information what milestone interactions passed through before entering Assisted Service.

A milestone is a custom benchmark (or checkpoint) that you've defined in an application to indicate that a significant point in the application flow was reached. For example, you might set up a milestone to mark when callers have made a successful payment, and another for when they've agreed to certain terms and conditions.

To get a better idea of what this report looks like, view sample PDF output from the report.

Prompts for the Assisted Service Interactions by Last Milestone Report

| Prompt | Description |
|---------------------|---|
| Pre-set Date Filter | From the list, choose a time period on which to report, and move it to the Selected list. |
| Start Date | Choose the first day from which to gather data into the report. |
| End Date | Choose the last day from which to gather data into the report. |
| Application | Choose the applications on which to report. By default, the report includes all applications; if you add any applications to the Selected list, then only those applications are included. |

Attributes used in the Assisted Service Interactions by Last Milestone Report

| Attribute | Description |
|------------------|--|
| Application Name | This attribute enables data within the reporting interval to be organized by the name of the Self-Service and/or Assisted-Service Designer application. |
| Last Milestone | This attribute enables data within the reporting interval to be organized by the name of the last milestone the call passed before enter Assisted Service. |
| Day | This attribute enables data within the reporting interval to be organized by a particular day. |

Metrics used in the Assisted Service Interactions by Last Milestone Report

| Metric | Description |
|---------------------------------------|--|
| Session | The total number of interactions that entered the Designer application during the reporting interval. |
| Avg Session Duration (Fmt) | The average amount of time that callers spent in the Assisted-Service phase of the Designer application. |
| Session Duration (Fmt) | The total amount of time that all callers spent in the Assisted-Service phase of the Designer application. |
| Transferred to Assisted Service (Fmt) | The total number of interactions that were transferred from the Self-Service phase of the Assisted-Service phase of the Designer application |

| Metric | Description |
|--------|--------------------------------|
| | during the reporting interval. |

To view more detailed information about the metrics and attributes in this report, and other metrics and attributes that can be used to customize reports, see the [Genesys CX Insights Projects Reference Guide](#).
