This report provides detailed information about callbacks that were processed by the contact center, allowing you to analyse callback performance based on nearly thirty metrics, including:

- Total number of accepted, declined, attempted, connected, cancelled, abandoned, and successful callbacks.
- Percentages of callbacks that were successful, unsuccessful, declined, or connected.
- Savings resulting from callbacks, including the total amount time and money saved and the average time and money saved per callback.

-
- The number of attempts made to complete callbacks, the time customers spent waiting for an agent, and time customers waited before abandoning a call.
