Import and export of custom dashboards, wallboards, and templates

The screenshot displays the Pulse GAX interface. A menu is open, showing options: Dashboard Management, Wallboard Management, Widget Template Management, and Import/Export Options. A handwritten arrow points to the 'Import/Export Options' menu item with the text 'Import/Export Options'. Below the menu, a dialog box titled 'Import/Export Options' is shown. It has 'Import' and 'Export' buttons. A handwritten arrow points to the 'Export' button with the text 'Import and Export'. The dialog box contains a table with columns: Name, Description, Modified, and a dropdown menu. A handwritten arrow points to the dropdown menu with the text 'Filter'. The table lists various dashboards, including 'BU-1 Billing Dashboard' and 'BU-1 Blusky Team'.

Name	Description	Modified	Details
Integration	Test for Integration	00/00/2015	Dashboard
Journey Dashboard		01/21/2015	Dashboard
Sales Dashboard		01/11/2015	Dashboard

You can export dashboards, wallboards, and templates from one environment to another. This means

after you create your own custom content based on the business requirements, you can easily build a package to use in other environments.

Export package file from your environment

1. In the source environment, in the **Manage** menu, select **Import/Export** options.
2. Select any dashboards, wallboards, and widget templates from the centralized repository. You can also apply a filter on the type of objects or the name of dashboards
3. Click **Export** to save a package file (JSON format) into your system.

Import package file to another environment

1. In the destination environment, in the **Manage** menu, select **Import/Export** options.
2. Click **Import** to select a previously exported package file.
3. Select the dashboards, wallboards, and widget templates from package file to import into your current environment
4. Click **Import**.
