Import and export of custom dashboards, wallboards, and templates

The screenshot shows the Pulse GAX interface. A menu is open with the following options: Dashboard Management, Wallboard Management, Widget Template Management, and Import/Export Options. The 'Import/Export Options' option is highlighted. Below the menu, a dialog box titled 'Import/Export Options' is displayed. It has tabs for 'Import' and 'Export'. The 'Export' tab is active, showing a table of items to be exported. The table has columns for Name, Description, Modified, and a checkbox. The items listed are:

Name	Description	Modified	Export
Pulse			
Integration	Test for Integration	00/00/2015	Export
Journey Dashboard		01/21/2015	Export
Sales Dashboard		01/11/2015	Export
Environment			
Scripts			
Pulse			
Dashboards			
BU-1			
BU-1 Billing Dashboard	This dashboard monitors the Service Level across the Bu...	12/11/2015	Export
Sales			
BU-1 Bluesky Team	Dashboard monitoring the Team Blue Sky in the Busine...	12/14/2015	Export

Handwritten annotations include 'Import/Export Options' pointing to the menu, 'Import and Export' pointing to the dialog box, and 'Filter' pointing to the search bar in the dialog box.

You can export dashboards, wallboards, and templates from one environment to another. This means

after you create your own custom content based on the business requirements, you can easily build a package to use in other environments.

Export package file from your environment

1. In the source environment, in the **Manage** menu, select **Import/Export** options.
2. Select any dashboards, wallboards, and widget templates from the centralized repository. You can also apply a filter on the type of objects or the name of dashboards
3. Click **Export** to save a package file (JSON format) into your system.

Import package file to another environment

1. In the destination environment, in the **Manage** menu, select **Import/Export** options.
2. Click **Import** to select a previously exported package file.
3. Select the dashboards, wallboards, and widget templates from package file to import into your current environment
4. Click **Import**.
