Details Panel (Right Side):

- BU1 Billing Dashboard**
Modified December 11, 2015
Author: default
- Description:**
This dashboard monitors the Service Level across the Billing queues of the Business Unit 1
- Access Groups:**
Permissions are set via GAX Configuration Manager
- Link to Configuration Manager**

You can export dashboards, wallboards, and templates from one environment to another. This means

after you create your own custom content based on the business requirements, you can easily build a package to use in other environments.

Export package file from your environment

1. In the source environment, in the **Manage** menu, select **Import/Export** options.
2. Select any dashboards, wallboards, and widget templates from the centralized repository. You can also apply a filter on the type of objects or the name of dashboards
3. Click **Export** to save a package file (JSON format) into your system.

Import package file to another environment

1. In the destination environment, in the **Manage** menu, select **Import/Export** options.
2. Click **Import** to select a previously exported package file.
3. Select the dashboards, wallboards, and widget templates from package file to import into your current environment
4. Click **Import**.
