Import and export of custom dashboards, wallboards, and templates

The image shows two overlapping screenshots of the Pulse GAX interface. The top screenshot shows a menu with options: Dashboard Management, Wallboard Management, Widget Template Management, and Import/Export Options. A handwritten arrow points to the 'Import/Export Options' menu item with the text 'Import/Export Options'. The bottom screenshot shows the 'Import/Export Options' page with a table of items. A handwritten arrow points to the 'Import' and 'Export' buttons with the text 'Import and Export'. Another handwritten arrow points to a search filter box with the text 'Filter'. The table contains the following data:

Name	Description	Modified	Details
- Pulse			
- Integration	Test for Integration	08/02/2015	Dashboard
- Journey Dashboard		01/21/2015	Dashboard
- Sales Dashboard		01/11/2015	Dashboard
- Environment			
- Scripts			
- Pulse			
- Dashboards			
- BU-1			
- Billing			
- BU-1 Billing Dashboard	This dashboard monitors the Service Level across the Bu...	12/11/2015	Dashboard
- Sales			
- BU-1 Bluesky Team	Dashboard monitoring the Team Blue Sky in the Busin...	12/14/2015	Dashboard

You can export dashboards, wallboards, and templates from one environment to another. This means

after you create your own custom content based on the business requirements, you can easily build a package to use in other environments.

Export package file from your environment

1. In the source environment, in the **Manage** menu, select **Import/Export** options.
2. Select any dashboards, wallboards, and widget templates from the centralized repository. You can also apply a filter on the type of objects or the name of dashboards
3. Click **Export** to save a package file (JSON format) into your system.

Import package file to another environment

1. In the destination environment, in the **Manage** menu, select **Import/Export** options.
2. Click **Import** to select a previously exported package file.
3. Select the dashboards, wallboards, and widget templates from package file to import into your current environment
4. Click **Import**.
