Time-off bonuses

Manage agents' time-off bonuses and understand the how bonus end dates affect carry-over hours.

When you create time-off rules, you configure time off to be either accrued or awarded. On the other hand, time-off bonuses are awarded, not accrued. You configure them (add, edit, and delete) as described in the procedures below.

Tip

If you do not have the Edit Time-Off Bonuses privilege in the **Agents** view, the **Add** and **Delete Time-Off Bonuses** icons are disabled.

Understanding bonus end dates

Time-off bonuses may or may not have a set End Date property, but it's important to understand how the **End Date** property affects the way in which WFM counts unused hours when processing carry-over hours.

If the time-off bonus *has* a specified end date, WFM processes carry-over as follows:

- If the end date of the bonus time is before the carry-over date, the bonus expires and WFM does not carry over any hours.
- If the end date of the bonus is after the carry-over date, the bonus remains assigned after the carry-over date (it doesn't expire on carry-over date) and WFM fixes the used hours in the carry-over record, meaning the unused hours pass to the new carry-over period and they are not subject to the maximum carry-over hours constraint.

If the time-off bonus *does not have* a specified end date, WFM carries over the bonus hours to the next configured carry-over date. The total number of hours carried over is subject to the maximum carry-over hours constraint. The bonus expires after the carry-over date. Any used hours are updated as they were before.
