Use the various Calendar reports to display calendar items data, such as time off, days off, shifts, rotating patterns, availability, working hours, exceptions, and preferences.

### Related documentation:

- 

The Calendar reports are:

- Calendar Items Report
- Time-Off Report
- Time-Off Balance Report
- Time-Off Management Report

To create a report, click that report's link (above) and follow the steps.

For a complete list of all WFM reports, see the Reports List.

## Restrictions

There are some restrictions when working with reports.

### Security restrictions

You can view and print reports only for those sites for which you have security access.

### Date restrictions

For reports whose wizard includes a **Date Range** screen:

- If you select weekly or monthly granularity, the **Start Date** and **End Date** selectors may be constrained to particular days (to the week's start and end days, or to the selected month's first and last days).
- If you enter dates that do not match these constraints and click **Next**, an error message alerts you to change your selection.
- If you select intra-day granularity, the **End Date** selector is disabled.

## Configuring the report

1. On the **Reports** tab, select **Calendar Reports** from the Views menu.
2. From the list in the **Objects** pane, select **Calendar Items Report**.  
**The Reports Wizard's first screen, Header, appears.**
3. Optional: To print a header on the report, select **Show Header** and type your header text into the text box.
4. Optional: To export the report to a file in the comma-separated values format:
  1. Select the check box **Create report with .csv friendly format**.
  2. After the report is created, select **Actions > Save As**.
  3. Select **Comma Separated** as the report format. (See Tip below.)
5. Click **Next**.
6. In the **Date Range** screen, select a start and end date for the report's data.
7. Optionally, you can select **Show comments/memo** to show comments or memos, if any, in the report.
8. Click **Next**.
9. On the **Data** screen, select the agents that you want to include in your report.  
**You can expand business units to display their sites, and expand sites to display their teams and agents. You can select any combination of teams and/or agents from multiple sites.**
10. Click **Next**.
11. On the **Calendar Items** screen, select the check boxes for items that you want to include in the report, and clear the check boxes for items that you want to omit. Available selections are:
  - **Rotating Patterns**
  - **Availability**
  - **Days Off**
  - **Shifts**
    - **Working Hours**
  - **Time Off**
  - **Exceptions**

**If you select Exceptions or Time Off on this screen, you must specify Exception and Time-Off types.**
12. Click **Finish**.  
**The report appears in the Report Viewer.**

### Tip

Do not use Workforce Management to print reports that you created in ".csv friendly format," (in step 4 of the procedure) because the result might be truncated. To print the file correctly, open it in a program that reads the .csv format, and then print it.
