Related documentation:

- **Google Chrome version 45 ends support for Java Plug-ins**—WFM Web will no longer work with Chrome v45 and later, due to Chrome's end of support for Java Plug-ins. If you are running WFM Web on Chrome v45 or later, Genesys recommends you use either Internet Explorer or Firefox.
- **Limitation for WFM Web in Google Chrome Stable Channel update version 42**—By default, this browser version blocks the Java plug-in with no pop-up or other indication.
Workforce Management supports Chrome, which means, in WFM Web, attempts to invoke Java applet subsystems prompts a message (after a long delay) that Java is not detected.

Resolution:

Starting with Chrome version 42, an additional configuration step is required to continue using NPAPI plug-ins.

To enable NPAPI in Chrome Version 42 and later

1. In your URL bar, enter: `chrome://flags/#enable-npapi`.
2. Click the **Enable** link for the **Enable NPAPI** configuration option.
3. Click the **Relaunch** button that appears at the bottom of the **Configuration** page.
