Important

The Release table lists the initial availability date for each release and the deployment environments for which a release is made available. Except when otherwise stated in the description for a specific release, each release includes all of the features and resolved issues that were introduced on earlier dates, regardless of the deployment environment. The features and resolved issues that apply only to a specific deployment environment are noted as such.

June 30, 2021			<p>Early Adopter Program support for Genesys Multicloud CX private edition deployments on OpenShift.</p>	9.0.000.06

September 20, 2022  

- 100.0.100.0018 available September 20, 2022
- Helm charts and containers

What's New

- Third-party dependency updates to maintain security and reliability.

For private edition

- Voice Dial Plan Service supports deployments on Azure Kubernetes Service (AKS) in Genesys Multicloud CX private edition. (CPE-3613)

August 25, 2022  

- 100.0.100.0016 available August 25, 2022
- Helm charts and containers

For private edition

- Third-party dependency updates to maintain security and reliability. (VOICEMCS-4762)

July 25, 2022

- 100.0.100.0015 available July 25, 2022
- Helm charts and containers

For private edition

- This release includes:
 - An updated container and new versions of the Helm charts.
 - Third-party dependency updates to maintain security and reliability. (VOICEMCS-3564)

March 28, 2022

- 100.0.100.0013 available March 28, 2022
- Helm charts and containers

Security Fixes

- This release includes important security upgrades made to third-party software. (GCLOUD-18868)

For private edition

- As of July 13, 2022, Voice Dial Plan Service is Generally Available for deployment in Genesys Multicloud CX private edition on the officially supported by Genesys.
- Support for deploying the Voice Dial Plan Service in a single namespace with other private edition services has been implemented. To deploy the Voice Dial Plan Service in a single namespace, override the **namespace** parameter in the Dial Plan Service Helm chart **values.yaml** file:

```
1 deployment:  
2   namespace: voice
```

(VOICEMCS-2912)

September 15, 2021 

- 100.0.100.0005 available September 15, 2021
- Helm charts and containers

For private edition

- Voice Dial Plan Service now supports the use of arbitrary, or random, user IDs (UIDs) in OpenShift.
 - The Dockerfile has been modified to specify container and file ownership as user=500 (genesys) and group=0 (root).
 - The securityContext settings exposed in the default **values.yaml** file specify the user and group IDs for the genesys user (500:500:500). You must override these Helm chart values if you want OpenShift to use arbitrary UIDs. For more information, see .
 - Voice Dial Plan Service is deployed using ServiceAccounts that use the **restricted** Security Context Constraint (SCC). In an earlier implementation, Genesys required you to deploy all private edition services using a ServiceAccount associated with the custom **genesys-restricted** SCC, to control permissions for the genesys user (500). Genesys now expects OpenShift to use arbitrary UIDs in your deployment, and the **genesys-restricted** SCC has been deprecated. If you previously deployed Voice Dial Plan Service using the **genesys-restricted** SCC, Genesys recommends that you redeploy Voice Dial Plan Service so that you use arbitrary UIDs. (VOICEMCS-2614)
More info:
- As of October 29, 2021, Voice Dial Plan Service supports deployments on Google Kubernetes Engine (GKE) in Genesys Multicloud CX private edition, as part of the Early Adopter Program. (CPE-1983)

June 30, 2021 

- 9.0.000.06 available June 30, 2021
- Helm charts and containers

For private edition

- Starting with this release, Voice Dial Plan Service is available for select customers in Genesys Multicloud CX private edition, as part of the Early Adopter Program. Deployments on OpenShift Container Platform (OpenShift) are supported. (VOICEMCS-1740)
