Important

The Release table lists the initial availability date for each release and the deployment environments for which a release is made available. Except when otherwise stated in the description for a specific release, each release includes all of the features and resolved issues that were introduced on earlier dates, regardless of the deployment environment. The features and resolved issues that apply only to a specific deployment environment are noted as such.

Available	Genesys CX on		Private edition	Highlights	Release
AWS	Azure				
October 6, 2023				Resolved issue.	100.0.100.0031
July 31, 2023				Resolved issue.	100.0.100.0029
August 25, 2022				Third-party dependency updates.	100.0.100.0021
July 25, 2022				Support for Genesys Multicloud CX private	100.0.100.0019

				edition deployments on GKE. <ul style="list-style-type: none"> Support for arbitrary UIDs in private edition deployments on OpenShift. 	
June 30, 2021				Early Adopter Program support for Genesys Multicloud CX private edition deployments on OpenShift.	9.0.000.12

October 06, 2023 

Resolved Issues

- Registrar service will now handle a Kafka disconnect gracefully by not sending `DNOutOfService` events until 3 minutes. The service will proceed with unregistering the DN according to the SIP registration timeout, if the Kafka disconnect exists even after 3 minutes. This feature is disabled by default and can be enabled by setting the `ENHANCED_KAFKA_DISCONNECT` environment variable to `true`. (VOICEMCS-5613)

July 31, 2023 

Resolved Issues

- Voice Registrar Service will no longer create duplicate registrations for the same DN after a Kafka disconnect and as a result, will avoid sending unexpected `DNOutOfService` events. (VOICEMCS-5562)

August 25, 2022  

- 100.0.100.0021 available August 25, 2022
- Helm charts and containers

For private edition

- Third-party dependency updates to maintain security and reliability. (VOICEMCS-4762)

July 25, 2022 

- 100.0.100.0019 available July 25, 2022
- Helm charts and containers

For private edition

- This release includes:
 - An updated container and new versions of the Helm charts.
 - Helm chart upgrades compatible for Kubernetes version 1.22 and Consul version 1.10.
 - Third-party dependency updates to maintain security and reliability. (VOICEMCS-3564)
- Voice Registrar Service supports deployments on Azure Kubernetes Service (AKS) in Genesys Multicloud CX private edition. (CPE-3613)

March 28, 2022 

- 100.0.100.0008 available March 28, 2022
- Helm charts and containers

Security Fixes

- This release includes important security upgrades made to third-party software. (GCLOUD-18868)

For private edition

- As of July 13, 2022, Voice Registrar Service is Generally Available for deployment in Genesys Multicloud CX private edition on the officially supported by Genesys.
- Support for deploying the Voice Registrar Service in a single namespace with other private edition services has been implemented. To deploy the Voice Registrar Service in a single namespace, override the **namespace** parameter in the Registrar Service Helm chart **values.yaml** file:

```
1 deployment:  
2   namespace: voice
```

(VOICEMCS-2912)

September 15, 2021

-  100.0.100.0003 available September 15, 2021
- Helm charts and containers

For private edition

- Voice Registrar Service now supports the use of arbitrary, or random, user IDs (UIDs) in OpenShift.
 - The Dockerfile has been modified to specify container and file ownership as user=500 (genesys) and group=0 (root).
 - The securityContext settings exposed in the default **values.yaml** file specify the user and group IDs for the genesys user (500:500:500). You must override these Helm chart values if you want OpenShift to use arbitrary UIDs. For more information, see .
 - Voice Registrar Service is deployed using ServiceAccounts that use the **restricted** Security Context Constraint (SCC). In an earlier implementation, Genesys required you to deploy all private edition services using a ServiceAccount associated with the custom **genesys-restricted** SCC, to control permissions for the genesys user (500). Genesys now expects OpenShift to use arbitrary UIDs in your deployment, and the **genesys-restricted** SCC has been deprecated. If you previously deployed Voice Registrar Service using the **genesys-restricted** SCC, Genesys recommends that you redeploy Voice Registrar Service so that you use arbitrary UIDs. (VOICEMCS-2614)
More info:
- As of October 29, 2021, Voice Registrar Service supports deployments on Google Kubernetes Engine (GKE) in Genesys Multicloud CX private edition, as part of the Early Adopter Program. (CPE-1983)

June 30, 2021

-  9.0.000.12 available June 30, 2021

-
- Helm charts and containers

For private edition

- Starting with this release, Voice Registrar Service is available for select customers in Genesys Multicloud CX private edition, as part of the Early Adopter Program. Deployments on OpenShift Container Platform (OpenShift) are supported. (VOICEMCS-1740)
