## Frequently Asked Questions

### What is the migration path from Genesys Interactive Insights to Genesys Customer Experience Insights?

- The new **Genesys Customer Experience Insights (GCXI)** is built on top of MicroStrategy while Genesys Interactive Insights (GII) is based on SAP Business objects.

Given the architectural differences between MicroStrategy and Business Objects, re-creation of the reports in GCXI is needed during migration.

Current out of the box reports from GII have been added to GCXI (plus some additional reports and dashboards). Custom reports that were built in GII should be re-created in GCXI by the customers.

### How do we find the information about the new product GCXI and its offerings?

- Please refer to the [Genesys Documentation](#) page for all the details about the user guide, deployment guide and other information about the GCXI product.
